Fish Harvest in Cage Culture

Introduction

Odisha is bestowed with inland, brackish water and marine resources for fisheries activities. Marine and inland fisheries have a wider scope for development in the state. Various central and state sector schemes are being implemented in the state for increasing fish production and making welfare of fishermen & fish farmers. The plan, programme and policies of fisheries sector are carried out through the Directorate of Fisheries, Odisha. Fisheries sector is extension oriented, which promotes scientific aquaculture and looks after welfare of fisher folk with all-round development of fisheries activities in the state.

Livestock production is predominantly rural based, contributing significantly to economic development of rural mass. Livestock Sector in Odisha is highly livelihood intensive and 80% of its rural households own livestock of one species or the other, earning supplementary income for the family. Besides, livestock development activities are being accelerated with a view to augment productivity in terms of milk, meat and eggs. Fisheries & Animal Resources Development Department is implementing programmes for disease control, immunization, breeding, feeding and management of livestock through the Directorate of Animal Husbandry and Veterinary Services, Odisha. Livestock healthcare service, as a major component of animal resources development in the state, is being delivered through 540 Veterinary Hospitals/Dispensaries, 314 Mobile Veterinary Units and 2939 Livestock Aid Centres.

Section A:
Fisheries Sector

HIGHLIGHTS 2023-24

Fisheries Sector

LAUNCHING OF MUKHYAMANTRI MASCHYAJIBI KALYAN YOJANA

During the year 2023-24, a new State Plan Umbrella Scheme “Mukhyamantri Maschyajibi Kalyan Yojana (MMKY)” was launched with following 17 nos. of components with a budget provision of Rs.447.99 Cr. to provide assistance directly to 50,000 fishers including 11,000 WSHGs and generation of more than 1 Lakh indirect employment. Under this scheme 58,850 farmers including 10,140 WSHGs and more than 1 lakh fishers were benefitted during FY 2023-24.

RELEASE OF LIVELIHOOD SUPPORT TO MARINE FISHERMEN DURING FISHING BAN PERIOD

A financial Assistance of Rs. 22.55 Crore as livelihood support was released during February, 2024 to 15,037 affected Marine Fishermen families of Bhadrak, Ganjam, Kendrapada, Jagatsinghpur & Puri Districts as financial subsistence allowance due to imposition of fishing ban from 1st November to 31st May every year. Livelihood assistance @Rs. 15000/- provided to each fishermen families i.e Jagatsinghpur-423 nos., Kendrapada-6773 nos., Puri-3450 nos., Ganjam-3638 nos. & Bhadrak-753 nos.

SOCIO-ECONOMIC TRANSFORMATION AND UPLIFTMENT (SETU) OF SWABHIMAN ANCHALA

The Balimela reservoir in the Chitrokonda block of Malkangiri district with a mean water spread area of 16,908 hectares, stands as the third largest reservoir in the state. This reservoir provides livelihood to 2000 fishermen families residing in the surrounding villages. To enhance fish production from the reservoir and sustain the livelihoods of the fishermen under SETU

programme, various activities are being taken up by the Government. During 2023-24, 2.00 Crore fingerlings were stocked at Balimela reservoir. Besides, 100 numbers of FRP fishing boats with net & lifesaving kits and 200 units of Monofilament Gill net have been distributed to the PFCS members.

RIVER RANCHING PROGRAMME

Under the programme “Enhancement of Production and Productivity”, the activity of river ranching was initiated with assistance provided by NFDB during the year 2020-21 for sustainable fisheries, reducing habitat degradation through biodiversity conservation, restoring the valuable resources and enhance the fish production to a sustainable level by maximizing social-economic benefits. During FY 2023-24, 85.08 lakh fingerlings were released in different stretches of Mahanadi, Brahmani, Baitarini, Rishikulya, Budhabalanga, Subarnarekha, Bansadhara river.

TRAINING & CAPACITY BUILDING

Training and Capacity building, Organization of Skill up gradation Training, short term training on specific subject and awareness meets, combines strategies, approaches and methods that would enable individual fish farmers, groups, and communities to play an active role in enhancing their income and augmentation of fish production of the State. Training conducted at various centres like Brackish water Training Centre, Paradeep, Fisheries Training Institute, Balugaon, ICAR Fisheries Institutes like CIFT, Kochi, CIFA, Kausalyaganga, BBSR and CIFNET, Visakhapatnam, MDRAFM, BBSR & NIRDPR, Hyderabad along with Exposure visits, organizing awareness meetings and Training in Block/ District/ State/ National/ International level for capacity building of

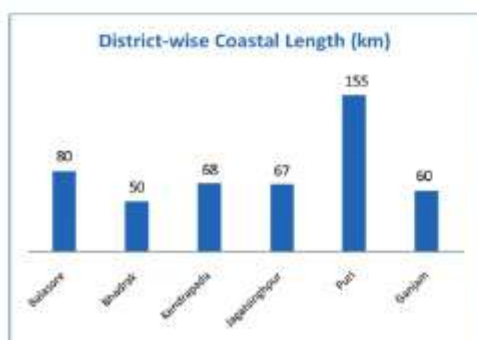

Departmental staffs and fishers. During the financial year 2023-24 a mega master plan of Rs 437.974 Lakhs was prepared after the Covid pandemic to impart training to 6,078 nos Farmers and Departmental staff in which 4,948 nos of farmers and 1,140 nos officials got trained successfully.

INTRODUCTION

Geographically diversified in many aspects, Odisha have 7.07 lakh Ha of freshwater resources, 4.18 lakh ha of brackish water resources, 480 km of coastline and continental shelf area of 24,000 km. Besides, the State also has Bhitarkanika mangroves and Chilika lake with wetland area of 650 km² and 1165 km², respectively. With such diverse aquatic resources at its disposal, the State could benefit immensely with respect to the development of fisheries thereby generating employment and promoting trade and many other associated commercial activities.

Odisha is one of the major fish producing state in India and ranks 4th in total fish production at National level after Andhra Pradesh, West Bengal and Karnataka. However, the growth of Fisheries sector in Odisha (CAGR-9.64% as 2nd highest) in last 5 years (2017-18 to 2021-22) is promisingly higher in comparison to India (6.34%) and neighboring fish producing states like Andhra Pradesh (8.68%) and West Bengal (1.42%).

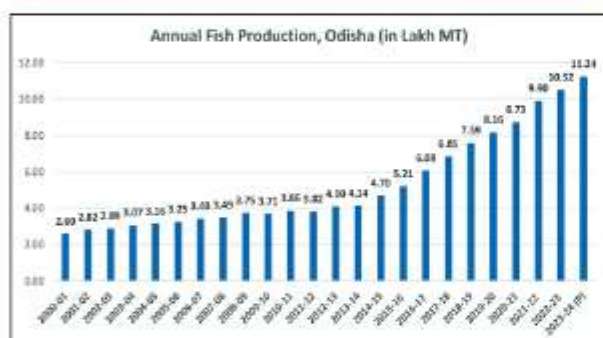

Due to its high proportions of fish-eating population (94.75%) and steady increase in per capita income and consumption, the State Government has been taking decisive action for creating an enabling environment for the fisheries sector to grow in a sustainable manner by utilizing its rich resources. Many programmes were taken up by the Department with the financial assistance from the State Plan schemes and CSS under PMMSY. For integrated development of fisheries sector, fishermen and fish farmers, Government of Odisha introduced the “Odisha Fisheries Policy-2015” to address sustainable utilization, protection, and promotion of the nutritional and livelihood security of the fisher community.

Total fish production 2023-24 (p) : 11.24 Lakh Metric Tons
Per capita annual fish consumption 2023-24 (p): 18.33 kg

Fish Production, Export, and Consumption

Odisha is the 4th largest fish producing State in India contributing 6% of the total fish production in India. There is a four-fold increase in total fish production in the State recorded fish production of 11.24(P) LMT during FY 2023-24 with a Compound Annual Growth Rate (CAGR) of 6.58% over the last 21 years {from 2.60 Lakh metric tons in 2000-01 to 11.24 lakh metric tons in 2023-24 (P)}. It contributes 2.73% to the Gross State Value Added (GSVA) during 2022-23.

- CAGR OF FISH PRODUCTION IS 6.6% OVER 23 YEARS
- CAGR OF FISH PRODUCTION IN LAST 9 YEARS IS 10.07%

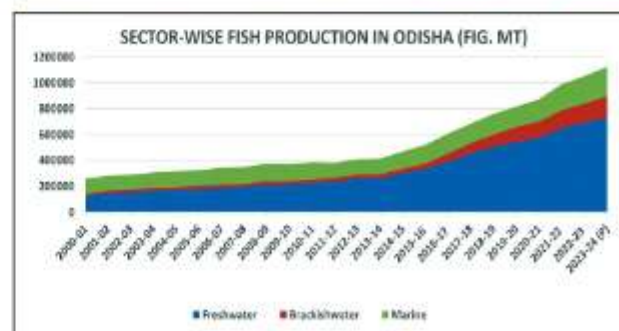

The freshwater fisheries sector has shown consistent growth in fish production over the last 23 years with about 8 % CAGR. It has grown about 6 folds from 1.25 lakh metric tons in 2000-01 to 7.34 lakh metric tons in 2023-24 (P). The growth in freshwater fish production gained momentum in 2015-16. It increased with a CAGR of 10.26% over last 9 years and more than doubled from 3.36 lakh metric tons in 2015-16 to 7.34 lakh metric tons in 2023-24(P). In last two decades, the fish productivity in freshwater culture tanks has increased by two folds from 1.85 metric tons/Ha/Year in 2000-01 to 4.33 metric tons/Ha/Year during 2023-24 (P).

The brackish water fisheries sector has remarkably grown by 12 times over last 23 years from 13,442 metric tons in 2000-01 to 1,62,344 metric tons in 2023-24(P) with a CAGR of 11.44%. Over last 14 years, the farmed shrimp production from brackish water tanks has increased from 11,629 metric tons in 2010-11 to 1,23,046 metric tons in 2023-24(P) with a CAGR of 19.90%.

In the marine fisheries sector, there was sustainable harvesting of marine fishery resources with a production growth from 1.21 lakh metric tons in 2000-01 to 2.27 lakh metric tons in 2023-24(P). However, there is scope to further sustainably enhance marine fish production in the State to harvest at Maximum Sustainable Yield (MSY) level of 2.93 Lakh metric tons with proper management measures in place (Source: Fishery Survey of India).

Odisha plans to enhance Monitoring, Control and Surveillance (MCS) capability for preventing and controlling IUUC fishing (Illegal, unreported and unregulated fishing) by installment of 2083 transponders covering all registered Mechanized boats. Also step has been initiated for enhancement of natural productivity of territorial water through deployment of Artificial reef at 93 sites along the coast.

SEAFOOD EXPORTS:

Odisha has extended its wide range of premium seafood products offering to the vast international market, especially to the USA, European Union, ASEAN, Japan, China and the Middle East Asian countries. There was about a spectacular twelve-fold jump in the value of seafood exports from the State during the last 21 years. It has increased from Rs.379 Crore in 2000-01 to Rs.3954.60 Crore 2023-24(P) at a CAGR of 10.73%. Similarly, the quantity of seafood export has increased by around 8 times from 10,644 metric tons in 2000-01 to 84,231 metric tons in 2023-24(P). Tremendous growth in seafood export due to the introduction of exotic variety of American white legged shrimp called vannamei (*Litopenaeus vannamei*). During 2023-24 new innovative component “Promotion of Aquaculture & Shrimp Export Cell” added under MMKY for production of value-added seafood products in consultation with MSME and Industry Dept.

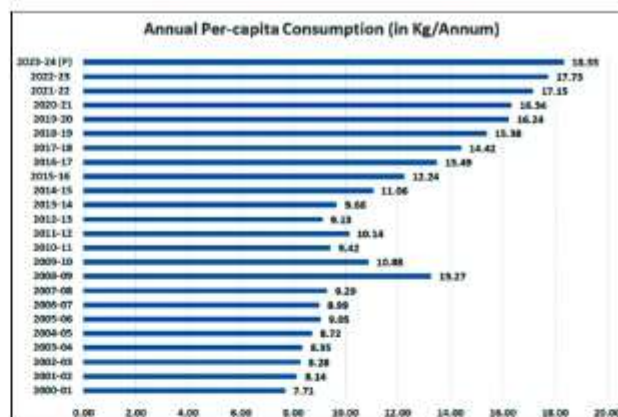

SEAFOOD EXPORT FROM ODISHA (MPEDA)

FISH CONSUMPTION:

Odisha has one of the highest a remarkable fish consuming population in India. As per the National Family Health Survey-5 (2019-21), 94.75% of people in Odisha consume fish. The per-capita fish consumption in the State has

increased from 7.71 kg in 2000-01 to 18.33 Kg in 2023-24 (P).

Fish Consumption In Odisha

94.75% of people in Odisha consume fish (Source: NFHS-5).

18.33 kg is the per-capita annual fish consumption during 2023-24.

FISH SEED PRODUCTION:

Fish seed is the primary requisite in fish farming business. There are 21 nos. of Government fish hatcheries, 38 govt rearing farms and 138 private fish hatcheries in the State. The total fish seed (fry) production has substantially increased from 27 Crores in 2000-01 to 310 Crores in 2023-24 due to increased local demand for fish seed caused by crop intensification and increased farm area, modernization of hatcheries and periodical introduction of quality broodstock under a special scheme of the Department. During 2023-24, Government hatcheries produced 58.93 Crores of fry (19.02%) and private hatcheries produced 251.06 Crores of fry (80.98%).

EARLY BREEDING PROGRAMME

1. Input assistance to fish seed hatcheries

Promotion of technology for early breeding of IMC is essential in the State to supply sufficient quantity of fingerlings to farmers and fishers to stock their tanks and reservoirs during early monsoon season (July – September). Early breeding of Indian Major Carps (IMC) was successfully achieved for the first time in the State in April 2020 through appropriate technological interventions in 4 Government Fish seed farms (Kausalyaganga, Chipilima, Bhanjanagar and Saramanga) with technical support from Worldfish. During the year 2023-24, Early breeding of Indian Major Carps (IMC) programme was taken up in 5 Government Mega Fishseed farms (Kausalyaganga, Chipilima, Bhanjanagar, Dighirahania and Saramanga) and 90.89 Crore IMC spawn was produced during peak summer month i.e. April-June. In total, 52 nos. of private hatcheries from different districts of the state have availed the scheme benefits and produced 338 Cr Spawn during 2023-24 under EB program.

2. Input assistance to Network of seed Growers

The Department has taken steps for year-round availability of quality sizable fish seed before commencement of pisciculture season with onset of monsoon from Government and private hatcheries in the State through establishment a network of seed growers in all districts at the door step of farmers. The private

seed growers having perennial fish pond can grow this early breeding spawn and make the fingerlings available to the farmers during July-September. A new scheme to provide input support to fish seed growers has been introduced by the F&ARD Department which intends to grow advance fingerlings (above 100 mm) in 3-4 months of seed rearing cycle. Fish farmers, WSHGs, PFCS and other Entrepreneur in all the blocks are to be encouraged. During the year 2023-24, the Department has covered 1798.81 Acres of ponds against the target of 2000.00 acre with subsidy assistance of 40% to General category and 60% to the SC/ ST/ PwD/ Transgender/ Women categories. This program ensured availability of 128 Cr. fry as stocking material for pisciculture tank equivalent to 1.28 lakh ha for year around availability of seed.

Spawn and Fry production in Odisha from 2016-17 to 2023-24				
Year	Government	OPDC	Private	Total
Spawn production in Lakh				
2016-17	3756	7576	19440	30772
2017-18	3651	8376	26201	38228

2023-24	2420	3473	25106	30999

A. DEVELOPMENT OF INLAND FRESHWATER FISHERIES SECTOR

1. Women Empowerment through Fisheries activities

(a) Input assistance to Women

Self Help Groups for pisciculture in GP tanks

The programme of “Input assistance to Women SHGs” for pisciculture in GP tanks” is being executed since its inception from 2017-18. The project is being carried out successfully along with the other converging departmental actors viz., FARD, Mission Shakti and PR&DW Department. The program provides an input subsidy of 60%, 50% & 40% on the Rs.4.00 Lakh/ Ha for WSHGs who have been tagged with GP tanks on a long-term lease basis and practicing pisciculture for three consecutive year. Odisha has about 78,000 Gram Panchayat Tanks (68,000 Ha), most of which remain un-utilized or under-utilized with regards to its potential. Odisha has around 7 lakh Women SHGs with over 60 lakhs of members. Capitalizing on this opportunity, Government took up the task of scientifically producing fish in the Gram Panchayat (GP) Tanks by the WSHGs and providing them the income opportunities since 2017-18, by bringing out a long-term (3-5 years) leasing policy of the GP Tanks across the 30 districts in the State.

Inter-Departmental Convergence & Policy reforms

About 78000 under- utilised GP tanks of covering WSA 68000 ha (Appx.) in Odisha are being put to use for fish production. GPs under Panchayati Raj and Drinking water Department (PR&DW) have around 7 lakh Women SHGs (WSHG) with a membership of 60 Lakh women. These WSHGs are registered and organized under Department of Mission Shakti. Since inception of the Scheme (from 2017-18), in total, 18,198 nos. of GP tanks with a total water spread area of 16518.00 Ha were brought under scientific fish farming with involvement of 17957 nos. of WSHGs under this scheme with long-term leasing policy of the State.

(b) WSHGs in Biofloc fish farming

WSHGs have recently opted for other income generating activities in fisheries sector. During last 2 years, total 136 nos. of WSHGs have carried out pisciculture in 542 nos. of Biofloc tanks.

2. Matsya Pokhari Yojana (MPY)

“Machha Chasa Pain Nua Pokhari Khola Yojana” or more popularly known as the “Matsya Pokhari Yojana” (MPY) was introduced since FY 2017-18, with a mandate to popularize scientific pisciculture in the State to increase its fish production thereby doubling the farmer’s income. To achieve this goal, a horizontal expansion of the activities was thought of by creating new tanks & ponds in private land to carry out intensive aquaculture & give a boost to income generation and entrepreneurship among the farmers and youth. Since, last three years, 4149.51 Ha of new freshwater fish tanks have been developed under this scheme. During FY 2023-24, new component on vertical expansion through intensive pisciculture in existing Tanks / Ponds were planned up and 816.82 Ha. of ponds were taken up for intensive pisciculture.

3. Input Assistance to farmers for taking up pisciculture in Agriculture Farm ponds

It is crucial to extend help to the farmers who are small/marginalized. In that regards, agricultural farm ponds are being developed in Odisha under MGNREGA by the Directorate of Soil Conservation and Watershed Development Department. These ponds act as a reservoir of water utilized to irrigate the farmer's agriculture land during the time of exigency. These same ponds also possess a potential to be utilized for not only raising fish fingerlings but also rearing the fish to its marketable size based on the water retention capacity. During the FY 2023-24, the Department of Fisheries & ARD has provided input assistance to 6648 nos. of farmers for facilitating production of fingerlings and table size fish too.

4. Promotion of Intensive Aquaculture through introduction of Bio-floc Technology in Fisheries

This is a kind of aquaculture system which needs a limited water exchange in which the fish is cultured at high stocking density, where the nitrogenous waste materials of fish can be re-utilized to produce feed for fish in the form of bio-floc. This floc is produced with a strong aeration and biota is formed in the water in the culture tank. It is a cost-effective technology in which the toxic materials from the fish and shellfish such as nitrate, and nitrite can be converted to useful product, i.e. proteinaceous feed. This advanced technology of pisciculture

was introduced to provide support to the promising entrepreneurs, job seeker like youth and interested progressive fish farmers since 2020-21, thereby increasing the fish production and to achieve self-sufficiency in the State. This scheme Promotion of Intensive Aquaculture through bio-floc technology for intensive farming of shrimp and fish provides a financial assistance of 60% and 40% to the SC / ST / Women / PWD / Transgender beneficiaries and to the General category people respectively with an option for 2, 4 or 6 tanks under State Plan Scheme. During FY 2023-24, 5108 number of tanks have been developed.

5. Promotion of Species Diversification through Genetically Improved Farmed Tilapia (GIFT):

Tilapia is a best suitable candidate fish which fits into the requirement to bridge the gap in term of nutritional benefits that it has to offer and secondly, the quantity one gets access to per head at a lesser price. This makes it a best suitable candidate of fish to be utilized to address the food and nutritional security. The wild variety like *Oreochromis mozzambicus* has now been replaced by Genetically Improved Farmed Tilapia (GIFT) which is a genetically improved variety of Nile Tilapia (*Oreochromis niloticus*) developed by WorldFish, Malaysia over the last 4 decades by employing selective breeding technology.

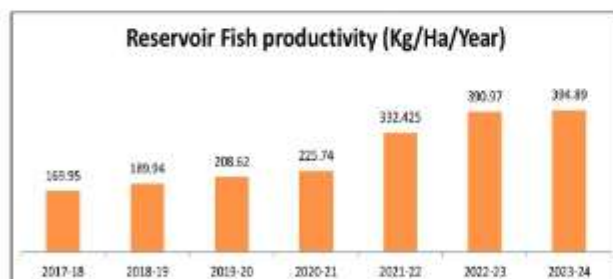

The production of GIFT Tilapia seeds have been started from the state of art "GIFT Tilapia Hatchery and Multiplication Centre" at Government Fish Seed Farm in Kausalyaganga. Selected farmers are provided handholding support for proper implementation of Better Management Practices (BMPs) and assisting farmers to market the tilapia in local fish markets. Proper biosecurity measures are assured during the

culture period as per the guidelines of the Government of India. During the FY 2023-24 from new state of art “GIFT Tilapia Hatchery and Multiplication Centre” at Government fish seed Farm, Kausalyaganga, Bhubaneswar 5.10 lakh mono-sex seed has been produced and distributed across the State and to the other States as well.

6. Enhancement in reservoir fish production and productivity:

Reservoirs are known as sleeping giant and its potential can only be realized when it is harnessed in proper manner by following a process of reservoir ranching. Stocking of 400 lakh fingerling done which resulted productivity enhancement up to a level of 394 kg/ha/year during FY 2023-24 in all 128 reservoirs of 20 districts from Government and private fish farm. This kind of stocking program will go a long way in maintaining the fish stock in the reservoir as well as will help 8000 families directly by providing the required nutrition and a source of livelihood to their families.

7. Installation of cages in Reservoir of Odisha

Piloting intensive farming of Catla and Rohu in large 16m dia. Circular Cages in reservoirs was successfully conducted in Hirakud reservoir by the involvement of local PFCS. Private entrepreneurs/companies in partnership with PFCS / SHG are encouraged for reservoir cage culture through a “lease-install-operate basis”.

Specific guidelines prepared for “Guidelines for taking up Reservoir cage culture by PFCS / SHG/ Private Entrepreneurs/ Companies” to promote cage in reservoirs of Odisha sustainably and in harmony with local PFCS. Based on NFDB guidelines on Cage Culture, the cage zone mapping was done using GIS application in 6 nos. reservoirs of Odisha. In Hirakud reservoir of Sambalpur District, a total of 2 clusters covering 31 zones and 620 sub-zones have been finalized. 404 entrepreneurs allotted with subzones out of which, MoU was done with 165 entrepreneurs with installation of 176 circular cage and 1252 rectangular cages by 2023-24.

8. World Bank Assisted OIIPCRA Project:

Like previous years, the FARD continued with the implementation of the World Bank assisted Odisha Integrated Irrigation Project for Climate Resilient Agriculture (OIIPCRA), a project under the Department of Water Resources which will be continued for five years since its inception to aid in the overall development of the fishery sector in the State. Under World Bank assisted OIIPCRA project, it is planned to promote (i) Species diversification in freshwater aquaculture sector through polyculture of IMC with Amur carp, minor carps and freshwater prawn (ii) Monoculture of GIFT tilapia and pangasius in order to enhance the fish productivity,

income and resilience of farmers. This activity will be taken up in private tanks belonging to eligible existing fish farmers / entrepreneurs and individuals who have newly entered fish farming in 15 OIIPCRA districts during 2021-22 to 2024-25. The key focus area of the OIIPCRA is “Climate-Smart Intensification and Diversification of Production” and objective of this component is to intensify production, strengthen farmers’ capacity to adapt to climate change stressors affecting crop and aquaculture production, and diversify production, especially during Rabi season in response to effective market demand.

Under the scheme, farmers will be financially supported to implement the polyculture system by providing financial assistance for farm inputs (100% assistance to all) in a participatory mode. During the FY 2023-24, 1281 beneficiaries and 79 WSHGs benefitted under the OIIPCRA project with utilization of Rs.16.68 Cr for development of fisheries units under the program.

OBJECTIVES OF OIIPCRA

- Achieve self-sufficiency in quality fish seed production.
- Develop and promote climate resilient aquaculture practice to enhance the adaptive capacity of small- scale farmers including women and to manage climate-induced impacts.
- Aquaculture species diversification as an adaptation strategy to reduce the risk and mitigate climate change impact.
- Capacity Building program of aquaculture stakeholder under WorldFish to foster enhanced knowledge on aquatic food production system and to strengthen community based institutional architecture.

B. DEVELOPMENT IN BRACKISH WATER SECTOR

The State have around 4.18 lakh Ha. of total brackish water areas, including the existing shrimp culture area, estuaries, Chilika and backwaters. At present, the area under brackish water aquaculture is around 17,730 Ha. The Coastal Aquaculture is regulated and managed as per the norms of Coastal Aquaculture Authority (CAA) guidelines. It is mandatory to register all the up-coming farms and renewal of license of existing farms under the CAA Act, 2005 & CAA (Amendment) Act, 2023.

During the year 2023-24 Brackish water area development was taken up under State plan scheme and CS-Scheme of PMMSY with subsidy assistance of 40-60% of the project cost for different categories of beneficiaries. During the year 503 beneficiaries excavated 283.06 ha pond at an unit cost of Rs. 14.00 lakh per Ha, 273 farms covering 150 Ha WSA for fresh registration and 146 farms covering 114 ha WSA for renewal received CAA license for Brackish water Aquaculture in coming days.

C. DEVELOPMENT IN MARINE SECTOR

Odisha is situated on the coast of Bay of Bengal and holds an excellent scope for fisheries development. It has a coastline of 480 km (301 miles) with a continental shelf area of 24000 km².

The State has six maritime districts namely Balasore (80 Km), Bhadrak (50 Km), Kendrapara (68 Km), Jagatsinghpur (67 Km), Puri (155 Km) and Ganjam (60 Km). The coastal and offshore waters of Odisha form a rich abode of quality pelagic and demersal resources. According to the richness of demersal stock along the northeast coast of India, Odisha ranks first in capture of demersal stock through bottom trawling, followed by Andhra Pradesh and West Bengal. A large part of this oceanic stocks however is totally protected or only fished for part of the year due to fishing restrictions imposed on mechanized and motorized fishing boats for 7 months (November to May every year) for protection of Olive Ridley turtle and 61 days (April 15th to June 14th every year) uniform fishing ban imposed on mechanized vessels and motorized fishing vessels above 8.5 mtrs. The imposition of these ban period restricts the growth of marine fisheries to a large extent.

1. Implementation of Odisha MFRA:

The Odisha Marine Fisheries Regulation Act, 1981 and the Orissa Marine Fishing Regulation Rules -1983 regulates the marine fishing, conservation and management of marine fisheries resources within the territorial limit of the State safeguarding the livelihood of marine fishers. The Registration, Licensing and Renewal of fishing vessels, enforcement, adjudication, and fishing ban are also regulated under the Act & Rules. During 2023-24, an expert committee meeting has been constituted and activities has been initiated for amendment of OMFRA Act-1981.

2. Popularisation of Fishery Machinery/ Equipment

This MMKY scheme component encourages the use of various machinery and equipment like aerators, air blowers, fishing nets, and bio-security nets to improve fish production

and productivity covering marine, inland & brackish water aquaculture with an admissible subsidy of 40% for all categories. 2043 nos of beneficiaries have been covered during FY 2023-24.

3. Motorization of Traditional Craft

“Motorisation of traditional craft” introduced during the year 2021- 22 has been carried under the State Plan umbrella scheme MMKY- to increase the Catch per Unit effort of fishing boats and increase the marine fish production of the State and increase the income and livelihoods of traditional fishermen by motorizing their traditional non-motorized crafts and 5 year old motorized fishing boats. Provision is made for an amount of Rs.406.00lakh to provide marine fishermen OBM engine (5 HP to 10 HP) and IBM engine (10 HP-28 HP) with subsidy assistance of @ 40% for General Category and @60% for SC/ ST/ Women/ PwD/ Transgender category. During the FY 2023-24, 616 nos of marine fishers have upgraded their traditional crafts with IBM & OBM.

4. Support to Coastal communities for Marine Fisheries for obtaining New Boat, Engine and Net

Under this State Plan scheme provision is made to provide new wooden/ FRP Boat with Engine and purchase new fishing net to eligible beneficiaries at unit cost of Rs.10.00 Lakh. Subsidy assistance is provided @ 40% for General Category and 60 % for SC/ ST/ Women/ PwD/ Transgender category. During FY 2023-24, 634 units of Boat, Net & Engine were assisted to Marine fishers and Rs16.65 cr was utilized.

5. Assistance for Fish Transport Infrastructure

This programme aims at providing Auto Rickshaw with Ice Box (Unit cost - Rs.3.00 lakh), Motorcycle with Ice Box (Unit Cost – Rs.0.75 Lakh), Insulated Vehicle (Unit Cost Rs.20.00 Lakh) as per the guidelines of the scheme. The admissible subsidy as per the present funding pattern is 40% for the General category and 60% for SC/ ST/ Women beneficiaries. Total Budget provision made for implementing the scheme is Rs 496.00 lakh and 365 nos of beneficiaries have been benefitted.

C. INFRASTRUCTURE DEVELOPMENT:

Initiative for up-gradation of Dhamra FH has been taken with a sanctioned amount of Rs.27.20 Crore under state plan. Further, during last 5 years, 2 FLCs (Markandi & Gopalpur has been developed, 6 FLC/ FH are under construction and pre-execution activities of 4 FLCs/ FH is in progress. Besides, during last 5 years, 3 fish markets and 1 dry fish wholesale market has been developed. 12 fish markets, 1 hygienic retail dry fish market, 1 State of the Art Wholesale fish market at Basta, Balasore are under progress. 38 no's of Government fish farms has been upgraded with expenditure of Rs 80.00 Cr. One heritage training centre has been developed at Angul with a budget of Rs4.75 Cr. to facilitate training to farmers and officials. Also a State level training unit of Rs.14.99 Cr. initiated at Kausalyaganga state fish farm. In the FY 2023-24, Rs.89.15 Crore was allotted and Rs 105.37 Cr. utilized for undertaking below mentioned infrastructure development activities like:-

- Construction of the State of the Art- wholesale Fish Market at Basta, Balasore.
- Construction of Wholesale Dry Fish Market at Huma.
- Construction of 3 Fish Markets at Sambalpur, Jajpur & Gajapati.
- Construction of Hygienic Fish Market at Odagaon.
- Construction of Hygienic Fish Market at Remuna .
- Construction of FLC at Kalupadaghat and Sorana in Khurda district.
- Development of a Sea-bass hatchery in OSSPARC Campus at Gopalpur in the District of Ganjam, Odisha.
- Upgradation and modernization of Bahabalpur FLC in Balasore district and Dhamara Fishing harbor in Bhadrak district.
- 9 nos. of Farm internal road, electrification, water supply system, packing shed, Watch man tower, boundary wall in urban area etc.
- Construction of 15 new FLCs in inland sector with furniture & electrification @ Rs15 lakh.
- Dredging of River mouth for Devi and Mahanadi near Astaranga FH and Mahanadi FH
- Establishment of GIFT satellite multiplication center at Bomlai, Sambalpur.
- Construction of the State-of-the-art Aqua Park at Chiplima, Sambalpur.

D. MUKHYAMANTRI KRUSHI UDYOG YOJANA (MKUY)

The State Government had launched the modified/revised guidelines on Commercial Agri Enterprises (CAEs) implemented as Mukhyamantri Krushi Udyog Yojana (MKUY) which was in effect since June, 2018. MKUY envisages the ease of doing agribusiness through process simplification of CAE implementation modalities by making it online in a simple, transparent and time bound manner at all the stages, especially for the growth and benefit of farmers & agricultural entrepreneurs of the state.

The assistance for establishment of commercial Agri-enterprises is 40% of the fixed capital investment (excluding the cost of the land) subject to a maximum limit of Rs. 1.00 Crore for general entrepreneurs and 50% of the fixed capital investment (excluding the cost of the land) subject to a maximum limit of Rs. 1.00 Crore for SC/ ST/ Women/ Transgender/ (PwD)/ Graduates of Agriculture & Allied disciplines. Under Fisheries sector, 29 units were developed worth Rs. 11.36 Cr with assistance under MKUY where assistance capping enhanced up to Rs. 1 Cr from 50 lakh during FY 2023-24.

E. PRADHAN MANTRI MATSYA SAMPADA YOJANA (PMMSY)

Pradhan Mantri Matsya Sampada Yojana (PMMSY) scheme was launched by Government of India to bring about Blue Revolution through sustainable and responsible development of fisheries sector in India with an estimated investment of Rs. 20,050 Crores. The Centrally Sponsored Scheme (CSS) Component is further segregated into non-beneficiary and beneficiary orientated subcomponents/activities

under the following three broad heads: (i) Enhancement of Production and Productivity (ii) Infrastructure and Post-harvest Management (iii) Fisheries Management and Regulatory Framework. During the FY 2023-24, 1310 units developed, 10957 beneficiaries benefited and 131857 fishers covered under GAIS under PMMSY.

ODISHA FISHERIES COOPERATIVE CORPORATION LTD. (FISHFED)

Fish on Wheels

16 nos. ready to eat Canteen Van "Fish on Wheels" are being operated at Bhubaneswar & Berhampur Municipal area with an objective to provide ready-to-eat fresh, hygienic and nutritious fish & fishery products to the consumers at their demand of places.

Management and Maintenance of Fish Landing Centres & Jetties:

Fisheries & ARD Department has been pleased to hand over the existing Jetty and Fish landing Centres to FISHFED for its management. In this regard, the Director of Fisheries has already handed over 24 nos. of FLC and Jetties to FISHFED for its operation and management. At present, Bahabalpur FLC and Balugaon FLC are being managed by FISHFED and other Jetties are being managed by local PFCS through FISHFED with the provision of all basic facilities for the development of fishermen community at the base site.

Modern Fish Selling Retail Outlets:

FISHFED has its own three nos. of “Chilika Fresh Kiosks” at Siripur, CRP Square, Sahid Nagar in Bhubaneswar. 13 nos. of Modern and Hygienic Chilika Fresh are being operated by M/S Falcon Marines Exports Ltd. in PPP mode inside Bhubaneswar Municipal Corporation area & one number of CHILIKA FRESH at Nayagarh town operated by Friends in PPP mode.

ODISHA PISCICULTURE DEVELOPMENT CORPORATION LTD. (OPDC)

Odisha Pisciculture Development Corporation Ltd. was established in 1998 and is engaged in

- Production and supply of best quality fish seed to fish farmers of Odisha as well as outside State
- Production and sale of high-quality nylon and HDPE fishnet webbings for farmers and fishermen of the State
- Sale of quality fuel, High Speed Diesel (HSD), Motor Spirit (MS) and lubricants to fishermen community operating trawlers, boats as well as surface transporters.
- Scope to enter into other businesses for the development of the fisheries sector which will make the corporation stable and sustainable.

OPDC has five self-owned Fish Seed Hatchery Projects (FSHP) and 18 departmental farms which are on lease for fish seed production meeting the requirements of the fish farmers of the State. Further OPDC operated eight numbers of HSD & MS outlets along the coast supplying quality fuel and other lubricants

meeting the requirements of fishermen venturing into the sea for fishing as well as surface transporters for minimizing post-harvest loss have been established along the coast.

Fuel Outlets of OPDC

Besides seed production and net manufacturing, OPDC is also operating 08 nos. of fuel outlets at the following places to sell good quality fuel to the fishermen of the coastal districts as well as surface transporters.

Net Manufacturing Unit of OPDC

The OPDC Net manufacturing unit is located at Mancheswar, Bhubaneswar. Its main function is the production and marketing of fishing nets of various specifications. This unit produces net webbings of different types such as Nylon mono-gillnet, HDPE net, fish dragnet, nylon multifilament webbings etc. These types of nets are being supplied to fishermen of Odisha under various subsidy schemes such as Popularization of Fishery machinery, OIIPCR, Assistance to WSHGs etc.

INFORMATION EDUCATION & COMMUNICATION

The "Information, Education, and Communication" (IEC) programme aims to educate fish farmers, fishermen, aquapreneurs, WSHG members across the state to adopt modern scientific culture practices, enhancing the fish production and productivity of the State. To disseminate various activities under State Sector umbrella scheme MMKY and Centrally Sponsored Scheme "PMMSY", there is need of IEC programmes for awareness among the people. Various flagship components under MMKY was popularized through various electronic & print media, through Poster, Banner & Hoarding etc.

IEC Activities under Electronic, Print & Social Media

Television and radio play a vital role for spreading messages state wide. To reach fish farmers & fishermen, the TV commercials, spots, and radio jingles on pisciculture activities was aired on regional News Channels, Doordarshan, FM Radio, and All India Radio. Advertisements in major Odia Newspapers and Social media has enhanced the awareness among the public on Government schemes and program.

During FY 2023-24, under IEC, dissemination of various Fisheries sector schemes and activities were broadcasted through Print & Electronic media. The State sector umbrella scheme and launching event of MMKY has been reached to the people across the State through broadcast in AIR (380 times), TV media (220 times), Newspaper advertisement (46 nos.). Different IEC materials containing scientific pisciculture practices, scheme guidelines, promotional events have been uploaded in different social media platforms (Facebook, X, Instagram, Youtube).

Wall Paintings, Posters & Hoardings

To create mass awareness among public across the state, 7320 wall paintings were made depicting Fisheries schemes & activities, 203820 posters were printed and pasted across the state for mass awareness purposes. A total of 450 hoardings have been installed throughout the state to attract the attention of farmers & public towards government programmes in Fisheries sector.

Fairs / Workshop

Krusha Odisha

Exhibition of Fisheries activities was showcased in the State Agriculture Fair- "Krusha Odisha-2024". Fisheries stalls, live models & live fish demonstration were successfully showcased in the fair. The Fisheries stall of Directorate of Fisheries received the 2nd best prize in the Govt. stall category.

State level Workshop on Odisha Seafood Export

A state level workshop on "Odisha Sea Food Export-2023" was held on 6th April, 2023 at Mayfair Convention, Bhubaneswar with involvement of leading Seafood Exporters, Processors, Scientists, Delegates from various State and Central organizations and officials of F&ARD Department. Major discussions, by addressing the delegates to ponder over Problems & Prospects in Odisha Seafood Export, Logistic issues of the Seafood Industry, Infrastructure, Technology & Policy Interventions required to achieve the ambitious target of 20,000 crore Seafood Export value in Odisha by the year 2030.

State level Consultation Workshop on Quality Fish Seed Production

State level Consultation Workshop on Quality Fish Seed Production was held on 21st December, 2023 at Mayfair Convention, Bhubaneswar. Around 200 participants including Pvt. Hatchery owner, Network of Fish Seed Grower attended the event. Government of Odisha envisages to achieve self-sufficiency in fresh water fish production over the next few years.

Agricultural Science Congress

Fisheries Stall, FARD, Government of Odisha bagged the 2nd position for key initiatives implemented in fisheries sector in Odisha among 104 stalls showcasing their activities and contributions during the National event of XVI Agricultural Science Congress & EXPO organised by National Academy of Agricultural Science (NAAS) at Kochi, Kerala from 10-13 October, 2023.

BUDGET

Establishment, Operation & Maintenance (EOM) Expenditure (in Lakh Rs.):

Year	Provision (In lakhs)	Expenditure
2022-2023	8403.06	7486.32
2023-2024	8812.21	8508.58

Plan Budget & Programme Expenditure (in Lakh Rs.):

Year	State Plan			Central Sponsored Plan		
	Provision	Sanction	Expenditure	Provision	Sanction	Expenditure
2022-2023	37619.29	34951.65	26984.85	17661.60	12824.27	12824.27
2023-2024	73776.09	59133.20	58680.66	18000.00	3270.66	3150.22

FISHERIES STATISTICS

Fish Production in Odisha (In Metric Tons)					
Year	Freshwater	Brackishwater	Total Inland (Freshwater + Brackishwater)	Marine	Grand Total

Section B

Animal Resources Development Sector

HIGHLIGHTS 2023-24

GMP COMPATIBLE VACCINE PRODUCTION LABORATORY

A GMP (Good Manufacturing Practice) compatible Bacterial Vaccine Production Laboratory for production of Haemorrhagic Septicaemia & Black Quarter vaccine using modern technology has been made operational at Odisha Biological Products Institute, Bhubaneswar with a project cost of Rs.70.91 crores. Production capacity of this laboratory is 2 crore doses of vaccine per annum for each vaccine. Random batches of Haemorrhagic Septicaemia vaccine produced was certified by C.C.S National Institute of Animal Health, Bagpat & Black Quarter vaccine by Indian Veterinary Research Institute, Bareilly.

MOBILE VETERINARY UNITS WITH NEW CUSTOMISED VEHICLES

Odisha pioneered in introducing Mobile Veterinary Units (MVU) at each Block of the State to deliver livestock healthcare services at the door-step of farmers in the villages far away from veterinary institutions. The hired vehicles of these Mobile Veterinary Units were replaced by government owned customised vehicles from 2023-24. In the first phase, 181 new vehicles were procured during September-2023 and rest 133 vehicles during February-2024.. On an average, these units are providing livestock healthcare, diagnostic and advisory services to about one lakh farmers per month.

RECRUITMENT & ORIENTATION OF 207 VETERINARY ASSISTANT SURGEONS

In 2023-24, the State Government recruited 207 Veterinary Assistant Surgeons as a measure towards strengthening of livestock healthcare service delivery in the state. Veterinary Assistant Surgeons play an important role in livestock healthcare and livelihood creation for rural people.

ON-CALL ARTIFICIAL INSEMINATION SERVICES

To boost milk production through cross-breeding, Odisha introduced On-Call Artificial Insemination service via 155 333 (Toll Free), Piloted in Puri district from July 2023.

VERMICOMPOST-GODHAN KENDRA

"Vermicompost - Godhan Kendra" promotes animal welfare and sustainable waste management in Odisha through Goshalas, MPCs members, and dairy farmers. This initiative not only manages waste efficiently but also generates additional income for participants.

ANIMAL AMBULANCE SERVICE

The "Animal Ambulance Service" scheme provides emergency healthcare for stray and destitute animals across 14 urban locations in 11 districts of Odisha. The service operates 24x7 in three shifts in Bhubaneswar (Saheed Nagar) and Cuttack, while in other urban areas, it operates in two shifts. Accessible via toll-free number "1962," this initiative ensures prompt response to animal emergencies, greatly improving animal welfare statewide.

DAIRY DEVELOPMENT THROUGH BUFFALO REARING

In order to enhance milk production in the state and to provide livelihood to livestock farmers, the state government has introduced Buffalo -

Rearing Scheme for the first time in the state. In this scheme, each beneficiary procured 2 buffalos where govt. provided 50 per cent subsidy for general category people and 60 per cent subsidy for SC/ST/women category.

EMPOWERING WOMEN SELF HELP GROUPS THROUGH BROILER POULTRY

Poultry farming, particularly broiler poultry farming, plays a significant role in providing instant income and improving the economic conditions of farmers. Broiler farming is especially appealing because it yields results in a short time with relatively low labor input. The state Govt. promotes broiler farming among women self-help groups, increasing farm capacity from 1,000 to 2,000 birds in 2023-24. A 40% subsidy of the project cost is given in two phases to empower women economically.

INTRODUCTION

Animal husbandry sector makes significant contribution to Odisha's economy, accounting around 3% of the state's GSVA during 2022-23. The sector has emerged as a key driver of economic growth, particularly in rural areas. The livestock sector contributes substantially to the economy through production of milk, meat, eggs and other animal products. Moreover, the sector provides employment opportunities to millions of people, particularly small and marginal farmers, landless laborers and women,

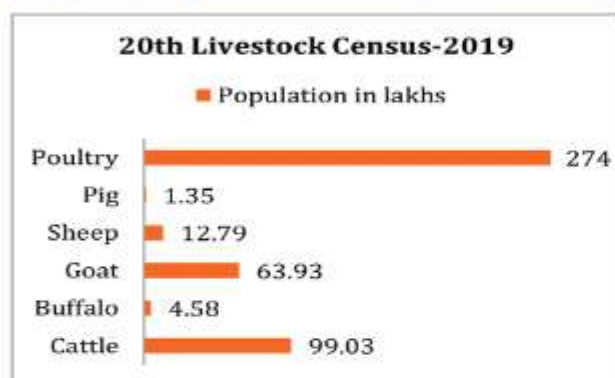

thereby playing a vital role in poverty reduction and rural development.

This report highlights the achievements and initiatives undertaken by Fisheries & Animal Resources Development Department during 2023-24 to promote sustainable development in animal husbandry sector, improve productivity and health of livestock and enhance the livelihoods of farmers and animal keepers across the State.

RESOURCES

Livestock Resources: Odisha possesses 3.4% of the livestock resource of the country according to the 20th livestock census conducted during 2019. The species wise population are as follows.

Sl. no	Species	Population in lakhs
1	Cattle	Indigenous
		83.23
		Crossbreed
		15.80
		Total Cattle
		99.03
		Indigenous Female
		44.96
		Crossbreed Female
		13.44
2	Buffalo	4.58
3	Goat	63.93
4	Sheep	12.79
5	Pig	1.35
6	Poultry	274

The state recorded a substantial increase in cross-bred cattle population. The cross-bred cattle population has increased from 13.06 lakh in 2012 to 15.8 lakh in 2019. The most significant aspect is crossbred female cattle population in the state which has increased by 44 per cent from 8.97 lakh in 2012 to 13.44 lakh in 2019.

1. DAIRY DEVELOPMENT

This report highlights the achievements and progress made during the year in strengthening the dairy value chain, enhancing milk productivity, and improving the overall efficiency of the dairy sector. As a major activity for Dairy Development, there is supply of breeding inputs to the 4641 field level frozen semen artificial insemination centres (Department: 3433 + Gomitra: 282 + BAIF & MAITRI : 497 + OMFED: 629) for production of high pedigree progenies and augmentation of milk production in the State.

Buffalo Entrepreneurship Development Scheme

The State Government launched the "Buffalo Entrepreneurship Development Scheme" in 2023-24 to boost milk production and support small and marginal farmers' livelihoods. Beneficiaries receive a back-ended subsidy: 60% for SC, ST, PWD, women, and transgender categories, and 50% for the general category, based on the unit cost of Rs.1.97 lakh for a (1+1) graded Murrah she-buffalo setup.

MAITRI (Multi-purpose Artificial Insemination Worker in Rural India)

The state is enhancing bovine productivity by expanding Artificial Insemination activities through MAITRIs. 1500 MAITRIS were trained to do artificial insemination in bovine which would enhance the productivity of dairy animals increasing milk production in the state.

On Call AI

On-Call AI (Artificial Insemination) service pilot project in Puri district has revolutionized and added transparency to the AI process, benefiting farmers and AITs (Artificial Insemination Technician). This is one of its kind programme for providing AI services at farmers' fingertip.

2. SMALL ANIMAL DEVELOPMENT

Goat rearing is a key livelihood for the rural poor. The Department has given efforts to enhance goat breeding, nutrition and management practices, leading to increased income and food security for smallholder farmers.

Sheep/Goat farming through WSHGs

During the year 2023-24, under State Plan an amount of Rs. 2984.72 lakhs was provisioned for establishment of 3010 number of (30+2) goat units through Women Self Help Groups (WSHGs) with 60% subsidy.

Semi Commercial Pig Farming

An amount of Rs.461.60 lakh was provisioned for pig rearing. 60% subsidy was provided for SC, ST, women, transgender and differently-abled beneficiaries and 50% subsidy for general category beneficiaries to establish 200 semi-commercial pig units (10 sows and 1 boar each)

Small Scale Goat Farming

An amount of Rs.891.15 lakh has been allocated during 2023-24 for establishment of small scale goat units. This new scheme supports individual farmers with 60% subsidy for SC, ST, women, transgender and differently-abled

beneficiaries and 50% subsidy for general category beneficiaries to establish 1550 small-scale goat units (10 does and 1 buck each) out of which 1496 units were established.

Small Scale Goat Farming and Small Scale pig Farming under OMBADC

During the year 2023-24, a sum of Rs.625.15 lakh has been provided for livelihood support to the farmers of seven mineral bearing districts of Odisha through 336 "Small Scale Goat Farming (10+1)" units and 30 "Small Scale Pig Farming (5+1)" units under OMBADC for the FY 2023-24.

Artificial Insemination in Goat

Odisha has become the first State in the country to launch state wide artificial insemination program for goats using semen of indigenous breeds such as Black Bengal and Ganjam. This pioneering initiative aims to improve the productivity and quality of goat breeds. During 2023-24, a total of 13,947 goats of 8,589 farmers were inseminated & 4,859 kids (male - 2,572 & female - 2,287) were born.

3. POULTRY DEVELOPMENT

As of 2023-24, Odisha has over one crore commercial layer bird population across 157 farms, producing 90.26 lakh eggs per day. Including backyard and semi-commercial layers, total production reaches 103.25 lakh eggs daily, with a per capita availability of 74 eggs per annum. The government is encouraging establishment of more layer farms by rural residents, unemployed youth and women to further increase egg availability and promote poultry entrepreneurship.

Poultry Schemes through OMBADC

Assistance is being provided for poultry farming to the affected people in 7 mineral bearing districts of the state under OMBADC for enhancement of their livelihood and income multiplication. This programme is being implemented with 100 per cent subsidy for the beneficiaries.

A. Small Scale Broiler Farming (200 birds)

Under this scheme, 415 units were established during 2023-24. The unit cost is Rs.71,000/- in this scheme.

B. Mini Poultry Feed Mill in SHG mode

Under this scheme, 6 units were established through WSHG during 2023-24. The unit cost is Rs. 2.80 lakh in this scheme.

C. Chick Rearing Unit in SHG mode

Under this scheme, 7 units were established through WSHG during 2023-24. The unit cost is Rs. 2.54 lakh in this scheme.

4. MUKHYAMANTRI KRUSHI UDYOG YOJANA (MKUY)

The Mukhyamantri Krushi Udyog Yojana aims to promote commercial agribusinesses units in the state through an easy, online, transparent, and timely process. The scheme provides a back-ended capital investment subsidy of 40% for general male applicants and 50% for women, SC/ST, PWD, and graduates in Agriculture & allied sectors, up to Rs. 100.00 lakh per entrepreneur.

Sl No	Name of the Project	Go-Aheads issued	Projects Completed	Subsidy Released (Rs. in Crore)
1	Animal Poultry Feed Plant	5	3	0.52
2	Commercial Broiler Farming	1157	317	43.92
3	Commercial Dairy Farming	1009	75	4.07
4	Commercial Layer Farming	28	16	6.92
5	Commercial Sheep Goat & Pig Farming	558	65	3.31
6	Milk/Meat Processing Unit	5	2	0.1
7	Others	39	1	3
	Total	2801	479	61.83

5. FODDER DEVELOPMENT

Animal Husbandry in the state will become sustainable by reducing production cost through use of green fodder as feed for livestock. During 2023-24 , 40,000 minikits were supplied, perennial fodder produced in 2870 acres and 2766 azolla units were established.

6. LIVESTOCK HEALTHCARE SERVICES

Animal diseases significantly hinder the growth of the livestock and poultry sector in the State, reducing meat, milk, and egg production while impacting farmers' livelihoods. To address livestock health, the Fisheries & Animal Resources Development Department provides veterinary services through dedicated veterinary institutions at different levels.

Veterinary Hospital/ Dispensary

These Veterinary Hospitals / Dispensaries provide animal health care, breeding, immunization, feeding and fodder technology, advisory services, and treatment of prevalent livestock diseases through sample testing.

They provide animal health care, artificial insemination, health camps, pregnancy diagnosis, castration, extension services etc. Further, Mobile Veterinary Units in each block provide doorstep services.

Livestock Aid Centre

A Livestock Aid Centre (LAC) operates at the Gram Panchayat level, often covering multiple Panchayats. They provide essential services like vaccination, artificial insemination, castration and extension services under the technical guidance of Veterinary Doctors.

During the year 2023-24, a total of 1,22,41,000 cases were treated.

Mobile Veterinary Unit (MVU)

Mobile Veterinary Unit (MVU), funded under the state plan scheme, provides health care, breeding and advisory services to farmers in villages at doorstep of livestock farmers. Besides, MVU provides emergency healthcare services for stray & destitute animals through Animal Help Line and during natural calamities. In 2023-24, all 314 MVUs were replaced with government-owned, customized vehicles. Each MVU team includes a Veterinary Doctor (VAS/AVAS) and is supported by local Livestock Inspectors and attendants.

Bio-Medical Waste Management

To ensure environmental hygiene and proper disposal of bio-medical waste, all 541 Veterinary Hospitals and Dispensaries have been tagged with a Bio-Medical Waste Management Agency.

Livestock Health & Disease Control Program (LH&DCP)

Livestock Health & Disease Control Program (LH&DCP) is the central sector umbrella scheme having component schemes, National Animal Disease Control Programme (NADCP) and Livestock Health & Disease Control Scheme (LH&DC).

7. FROZEN SEMEN BANK (FSB)

The only bull semen station of the state focuses on improving the genetics and productivity of cattle population through production and distribution of high-quality bull semen. FSB works towards cattle breeding, fertility and overall herd development supporting the growth and sustainability of livestock sector through Artificial Insemination Program.

The Frozen Semen Bank (FSB), Cuttack is an ISO 9001:2015 certified semen station. It now maintains 103 bulls across twelve categories including Jersey, HF and Sahiwal.

Bulls are managed according to GOI's Minimum Standards for Production (MSP) and sourced from various approved entities. They are regularly screened for diseases such as BVD, IBR and Brucellosis by RDDI Kolkata, while NDDDB conducts karyotyping, GEBV estimation and genetic disease testing for crossbred bulls.

8. ODISHA BIOLOGICAL PRODUCTS INSTITUTE (OBPI)

The Odisha Biological Products Institute (OBPI), plays a crucial role in development, production and distribution of high-quality vaccines, in protecting animal health from infectious diseases. A new GMP-compliant laboratory for bacterial vaccines has also been established at Bhubaneswar.

OBPI, Bhubaneswar produces bacterial vaccines namely Haemorrhagic Septicaemia (Alum ppt.) Vaccine, Black Quarter Vaccine and viral vaccines namely Freeze Dried Ranikhet Disease Vaccine (F1 Strain and R2B Strain) & Freeze Dried Fowl Pox Disease Vaccine. The OBPI has a satellite unit at Berhampur, which was established on June 15, 1992 to serve vaccine needs in 10 southern districts of Odisha, including KBK districts. It currently produces Anthrax Spore Vaccine (live) and Enterotoxaemia vaccine for the entire state with products standardized at OBPI-Bhubaneswar.

Good Manufacturing Practice (GMP) Laboratory

GMP compatible bacterial Vaccine production laboratory for HSV & BQV using fermentation technology is being used at this institute. During the year 2023-24, six (6) initial experimental batches were conducted (HSV-5 batches & BQV-1 batches) with production of around 30.53 lakhs doses of vaccines.

9. ANIMAL DISEASES INVESTIGATION AND SURVEILLANCE

The Animal Disease Research Institute (ADRI) is a State Level Referral Laboratory specializing in livestock disease research, diagnosis, monitoring, and surveillance. It also provides training to department field staff to enhance their scientific knowledge and offers expert services during natural calamities and disease outbreaks.

Disease Surveillance & Diagnosis

At field level, State Veterinary Laboratory (SVL), Clinical Investigation Laboratories (CIL) and Disease Diagnostic laboratories (DDL) are involved in disease diagnosis and surveillance activities. Disease Diagnostic Laboratories (DDLs) are functioning in all the district headquarters to provide need based diagnostic services of livestock & poultry diseases.

10. STRENGTHENING INFRASTRUCTURE FACILITIES

For the year 2023-24, construction of new hostel of VOTI has been undertaken. Provision has been made for construction of administrative building of OBPI, ADRI & FSB. Considering the non-availability of dedicated source of water supply, provision for the same has been made for 66 Veterinary Dispensaries & Hospitals.

Similarly for safe parking of the newly launched MVU vehicles, provision of garage has been done at 124 Veterinary Dispensaries & Hospitals.

New buildings for 20 Livestock Aid Centres are being constructed to strengthen the veterinary service delivery at grassroot level.

11. VETERINARY OFFICERS' TRAINING INSTITUTE (VOTI)

VOTI is responsible to organise and conduct training courses for veterinarians, para veterinarians, ministerial staff of ARD sector and collaborates with other institutions in and outside the state for organising training programmes.

Pet Health Management

During the FY 2023-24, seven batches of Pet Health Management Training of 5 days duration each for veterinary officers were conducted at VOTI. A total of 140 veterinary officers attended the said training program.

Induction Training Programme for newly recruited OVS Group-A Officers

Under State Plan Scheme "Capacity Building and Strengthening of Training Infrastructure under ARD Sector" for the Year 2023-24, Induction Training Programme for newly recruited OVS officers was conducted in seven batches each of seven days duration and 30 participants.

Other Trainings

During 2023-24, six batches of accounts and administration training each of 5 days duration for senior veterinary officers were conducted at VOTI. Three batches of training programme regarding Behavioural Management with special reference to Soft Skill each of 5 days duration for Para-vets were conducted at SMILE. A total of 60 para-vets attended the said training program.

Exposure Visits

Total 20 field veterinary officers attended training programme at CVSc & AH (OUAT) on “X-ray and ultrasonography moderate diagnostics techniques”.

Exposure visit was organised for 140 field veterinary officers to ULDB, Uttarakhand under RGM for 4 days training on “implementation & Handling of sex sorted semen” Exposure visit to ICAR-CIRG Makhdoom, Mathura was organised for 40 field veterinary officers each of 3 days duration to gain knowledge on “advanced breeding technology on Goat AI.

12. ANIMAL WELFARE ACTIVITIES

As part of its commitment to the humane treatment of animals and the prevention of cruelty, the department undertakes a range of activities aimed at improving the lives of animals. During 2023-24, an amount of Rs. 812.00 lakhs was utilised under the scheme “Support to Goshalas” to support 59 goshalas in the state. An amount of Rs.70.00 lakh has been released to 26 districts under the scheme “Support for Seized Animals”.

Establishment of New Stray Cattle Shelter Houses/Goshalas

An amount of Rs.20 to Rs.52 lakh is being provided for construction of Goshalas to shelter 50 to 150 animals. Till date 28 Go-ahead letters were issued and 17 Goshalas have been completed.

“Vermicompost - Godhan Kendra”

Under the scheme Vermicompost Godhan Kendra support is extended to gosala, livestock farmers, milk cooperative societies to establish vermicompost unit for enhancing their income waste management and sustainability of dairying. During the year an amount of Rs 497 lakh has been placed to districts for construction of 95 such units.

Animal Help Line (AHL) facility with Veterinary Ambulance Services

Fisheries and ARD Department has established animal helpline facilities in 14 locations across 11 ULBs, offering emergency services for stray animals through a toll free call number, 1962. In Bhubaneswar and Cuttack, the helpline operates 24x7, while other locations provide services in two shifts from 6 AM to 10 PM.

Tele-Veterinary Service

Tele-Veterinary service is functioning from 10.00 AM to 5.30 PM on all days to provide farmers livestock healthcare and veterinary advisory services through toll free No.-1962 or 155333.

13. ODISHA LIVESTOCK RESOURCES DEVELOPMENT SOCIETY (OLRDS)

Odisha Livestock Resources Development Society (OLRDS) is the implementing agency for all bovine breeding activities of the state.

Achievements under Artificial Insemination Programme:

Use of Conventional Frozen Semen

A total of 9.30 lakh Artificial Inseminations have been conducted during the financial year 2023-24 with 4.25 lakh AI calves born. A total of 11.09 lakh animals have been covered (96.8% of target) against the target of 11.45 lakh.

Use of Sex sorted Semen

The State plan scheme "Use of Sex Sorted Semen for enhancing Milk Production" was implemented in 247 blocks & "Use of Sex Sorted Semen for genetic improvement of Cattle" under OMBADC was implemented in 67 blocks with objectives to produce 90% female calves of high genetic merit. A total of 1,07,016 AI has been done using Sex Sorted Semen covering 1,04,887 animals benefitting 84,276 farmers. 20,000 calves were born and 89.12% of total calves (17,825) are female.

Livestock Insurance

Under risk management component of the centrally sponsored scheme National Livestock Mission (NLM), large and small animals are being insured. It covers indigenous/crossbred milch animals, bullocks, breeding bulls, goats, sheep, pigs and rabbits. During 2023-24, a total of 1,17,395 animals were covered, with Govt. share of Rs.278.57 lakh towards premium amount and Rs.181.83 lakh as farmers' share.

14. ODISHA STATE POULTRY PRODUCTS CO-OPERATIVE MARKETING FEDERATION LTD (OPOLFED)

Odisha State Poultry Products Co-operative Marketing Federation Ltd. (OPOLFED) operates in a two tier system i.e. Poultry Producers' Co-operative Society (PPCS) & Women Poultry Co-operative Society (WPCS) at grassroot level and the federation at the apex level. Until now, 48 PPCS/ WPCSs have been affiliated to this federation.

Activities of OPOLFED during 2023-24

OPOLFED has been procuring eggs, packet eggs, live broiler birds, LIT birds, deshi, Vanaraja birds etc. from OPOLFED's affiliated PPCS /WPPCS. OPOLFED is marketing eggs, packet eggs, dressed chicken meat to the consumers and the agents on reasonable prices. During 2023-24, 540 MT live broiler chicken and 18 lakh eggs were marketed.

OPOLFED has been supplying four weeks' old LIT birds, layer birds, 14 weeks old Pullets through different Govt. activities across the state. OPOLFED has established two Chicken Fresh Outlets on PPP mode at NH side, Chhatabara Chhaka, Khordha & CDVO Office Campus, Sonepur for marketing of poultry & poultry products.

15. ODISHA STATE COOPERATIVE MILK PRODUCERS' FEDERATION LIMITED (OMFED)

OMFED (Odisha State Cooperative Milk Producers' Federation Limited) is the apex organisation in milk procurement, processing & marketing in Odisha. OMFED collects milk from dairy farmers of the state through its Milk Producers' Cooperative Societies (MPCS) functioning at village level. This milk is being processed and marketed through the network developed involving distributors, stockists and retailers. As of now 6445 MPCSs have been organized in which 3.30 lakh farmers were enrolled, out of which 1.28 lakh are women members. In the year 2023-24, OMFED on an average has procured 4.92 lakh litres of milk/day.

Milk and Milk Products Marketing

- ▶ OMFED is supplying about 3.26 lakh litres of milk & milk products to the customers through retail outlets/distributors in the state.
- ▶ Due to purity of OMFED Ghee, OMFED is supplying ghee to Lord Jagannath Temple and Lingaraj Temple.
- ▶ OMFED has started online marketing and home delivery system through Zomato & Swiggy.
- ▶ Cold chain facility (Bottle Coolers, Deep Freezers & Vizicoolers) has been provided to 930 outlets/agents throughout the state to maintain the quality of milk & milk products.
- ▶ **Cattle feed** : Premium cattle feed is being produced by OMFED at Radhadamodarpur, Cuttack and pellet cattle feed at Jagannathpur, Khordha. These are supplied to the farmers at subsidized rate @ Rs.23/kg & Rs.23.50 /kg respectively. The total capacity of both the plants is 350 MT/day. Total production of cattle feed during 2023-24 is 30962.75 MT

16. INFORMATION, EDUCATION AND COMMUNICATION

The "Information, Education and Communication" (IEC) programme educates livestock farmers on modern practices to boost production and productivity, enhance livelihoods and foster entrepreneurship.

IEC Activities under Electronic, Print & Social Media

To educate livestock farmers of the state, TV commercials, TV spots and radio jingles on livestock activities aired on regional channels, Doordarshan, FM Radio, and All India Radio. Advertisements in major Odia newspapers enhanced awareness. Social media, crucial in today's tech-savvy society, was also utilized. The State Government's Animal Resources Development (ARD) sector uses Facebook, Twitter(X) and YouTube to educate the public on modern animal husbandry practices.

Wall Paintings, Posters & Hoardings

To create mass awareness, 8,603 wall paintings depicting ARD activities were made, and 135,960 posters were printed and pasted statewide. Additionally, 554 hoardings were installed to attract farmers' and the public's attention to government ARD programs.

Krusha Odisha-2024

Animal Resources Development exhibition was organized in the state level agriculture fair Krushi Odisha 2024. Sixteen stalls were designed to showcase livestock related activities.

LAUNCHES/ WORKSHOPS

Stakeholders' interaction for making Odisha self-sufficient in egg production

A workshop titled “Odisha-Towards Self-Sufficiency in Egg Production” was held on October 28, 2023, at Mayfair Convention, Bhubaneswar. This event was part of Odisha’s mission to achieve a production target of 12 million eggs per day by 2024-2025.

National Milk Day

A workshop on “Enhancing Production & Productivity in the Dairy Sector vis-a-vis Value Addition and Marketing of Milk” was held on November 26, 2023 to celebrate National Milk Day. About 500 participants attended the programme.

Flagging-off Ceremony of New MVU Vehicles

In the first phase, 181 new Mobile Veterinary Unit (MVU) vehicles were flagged-off on 8th September 2023 and rest 133 new vehicles were flagged-off on 28th February 2024 at Kalinga Stadium, Bhubaneswar. These new MVU vehicles are customised and equipped with diagnostic tools along with a minor operation theatre.

World Egg Day

A workshop on “Poultry as an Entrepreneurship & Income Enhancement through Poultry Farming in Odisha” was held on October 13, 2023, on the eve of celebration of World Egg Day-2023. About 400 participants attended the programme.

NEW INITIATIVES 2023-24

Matsya O Pranee Sampad Mela (MOPSM)

District level fisheries and animal resources development fair “Matsya O Pranee Sampad Mela (MOPSM)” was organized for the first time in all districts of the state during September to December 2023. With activities like general meetings, farmers-scientists interaction, exhibitions, live demonstration of fish, livestock & birds and cultural programmes, the fairs created mass awareness among fishers, fish & livestock farmers on adoption of scientific farming practices through use of modern technologies. Around one lakh visitors witnessed the exhibitions and more than hundred fish & livestock farmers got felicitated in MOPSM.

MATSYA-PRANEE SAMAVESH ODISHA (MPSO-2024)

Under the overarching theme of ‘Multiplying Farmers’ Income through Fisheries & Animal Husbandry’, the state level fisheries & animal resources development fair “Matsya-Pranee Samavesh Odisha-2024” was organised for the first time in the state from 16th to 18th February 2024 at Janata Maidan, Bhubaneswar. The Samavesh sought to ignite a wave of mass awareness, empowering farmers with knowledge on scientific farming practices and adoption of modern technologies in Fisheries & ARD sector.

A bucket of activities viz. live animal demonstration, stall exhibition, seminars, LED tunnel, virtual tour, dog show, walkathon, cultural programmes were organized to engage the visitors in knowledge gaining procedures. Around 50,000 visitors from across the state witnessed the event, more than 6000 farmers took part in exhibitions, around 200 farmers got felicitated and 2400 farmers participated in 12 knowledge-sharing interactive sessions.

Champion Buffalo Bull 'YUVRAJ' brought from Haryana was exhibited in MPSO – 2024. The owner collects semen from Yuvraj and sells a dose of it at Rs.300/-. He earns around Rs. 30 lakhs per year out of it. The feed of Yuvraj included 20 litres of milk and 5 kg of apple per day besides green fodder and concentrate feed. The approximate cost of Yuvraj is Rupees One Crore.
