# Introduction

**O**disha is bestowed with inland, brackish water and marine resources for fisheries activities. Marine and inland fisheries have a wider scope for development in the state. Various central and state sector schemes are being implemented in the state for increasing fish production and making welfare of fishermen & fish farmers. The plan, programme and policies of fisheries sector are carried out through the Directorate of Fisheries, Odisha. Fisheries sector is extension oriented, which promotes scientific aquaculture and looks after welfare of fisher folk with all-round development of fisheries activities in the state.

Livestock production is predominantly rural based, contributing significantly to economic development of rural mass. Livestock Sector in Odisha is highly livelihood intensive and 80% of its rural households own livestock of one species or the other, earning supplementary income for the family. Besides, livestock development activities are being accelerated with a view to augment productivity in terms of milk, meat and eggs. Fisheries & Animal Resources Development Department is implementing programmes for disease control, immunization, breeding, feeding and management of livestock through the Directorate of Animal Husbandry and Veterinary Services, Odisha. Livestock healthcare service, as a major component of animal resources development in the state, is being delivered through 541 Veterinary Hospitals/Dispensaries, 314 Mobile Veterinary Units and 2939 Livestock Aid Centres.

## MUKHYAMANTRI MASCHYAJIBI KALYAN YOJANA

In the year 2024-25, the State Cabinet approved the implementation of the State Plan Umbrella Scheme, "Mukhyamantri Maschyajibi Kalyan Yojana (MMKY)," for a five-year period with a budget allocation of ₹2,239 crore. The scheme comprises 17 components aimed at directly assisting 3 lakh fishers, including 50,000 WSHGs, while also generating over 7 lakh indirect employment opportunities. For the financial year 2024-25, a budget provision of ₹343.99 crore has been allocated. During this period, the scheme benefitted 51408 farmers, including 10244 WSHGs, and over 1 lakh fishers were benefitted during FY 2024-25.

## RELEASE OF LIVELIHOOD SUPPORT TO MARINE FISHERMEN DURING FISHING BAN PERIOD

A financial Assistance of Rs 25.11 Cr. as livelihood support was released during February, 2025 to 16,740 affected Marine fishermen families of Bhadrak, Kendrapada, Jagatsinghpur, Puri and Ganjam as financial subsistence allowance due to imposition of fishing ban from 1st November to 31st May. Livelihood assistance @ Rs 15,000/- have been provided to each fishermen family.

## INSTALLATION OF ISRO TRANSPONDERS IN FISHING BOATS

In the financial year 2024-25, under the Centrally Sponsored Scheme "Pradhanmantri Matsya Sampada Yojana," ISRO transponders were successfully installed on 1,284 mechanized fishing boats to enable a two-way communication system. The movement of these fishing boats during voyages could be monitored using the Government of India's NAVAMITRA app. The installation of ISRO transponders played a crucial role in recalling fishing boats for safe berthing during Cyclone DANA.

## TRAINING & CAPACITY BUILDING

Under the scheme Training and Capacity building, Organization of Skill up gradation Training, short term training on specific subject and awareness Meet combines strategies, approaches and methods that would enable individuals fish farmers, groups, and communities to play an active role in enhancing their income and augmentation of fish production of the State. So it is very necessary to disseminate information on advance technology practices, Fisheries Schemes, Programmes, activities and outreach technology to the grass root level through various practices like Exposure visits, organizing awareness meetings and Training in Block/ District/ State/ National level along with Capacity building and refresher training of Departmental staff.

“Training ” and all of us synonyms, orientation programme, capacity building, awareness meet, skill up gradation training programme as well as Exposure visit serve as catalysts to breeze the gap between land and lab. The prime objective at all the programmers to enlighten the fish farmers, groups, fisher folk with modern technical knowledge in Aquaculture as well as the benefits of the different state & central sector schemes. Under the scheme “Training & Capacity building during the year 2024-25 against the budget provision of Rs 641.82 lakh around 4861 nos farmers & 1503 nos officer trained in which 819 women included .

| Abstract of Training programme 2024-25 |                                                                                                                                                                           |                           |

## INTRODUCTION

Geographically diversified in many aspects, Odisha have 7.04 lakh Ha of fresh water resources, 4.18 lakh ha of brackish water resources, 575 km of coastline and continental shelf area of 24,000 km<sup>2</sup>. Besides, the State also has Bhitarkanika man groves and Chilika Lake with wet land area of 650 km<sup>2</sup> and 1165 Km<sup>2</sup> respectively. With such diverse aquatic resources at disposal, the State could benefit immensely concerning the development of fisheries there by generating employment and promoting trade and many other associated commercial activities.

Due to its high proportions of fish-eating population (94.75%) and

steady increase in per capita income and consumption, the State Government has been taking decisive action for creating an enabling environment for the fisheries sector to grow sustainably by utilizing its rich resources. Many programmes were taken up by the Department with the financial assistance from the State plan scheme and CSS under PMMSY. For integrated development of fisheries sector, fishermen and fish farmers, the Government of Odisha introduced the Odisha Fisheries Policy-2015 to address sustainable utilization, protection and promotion of the nutritional and livelihood security of the fisher community.

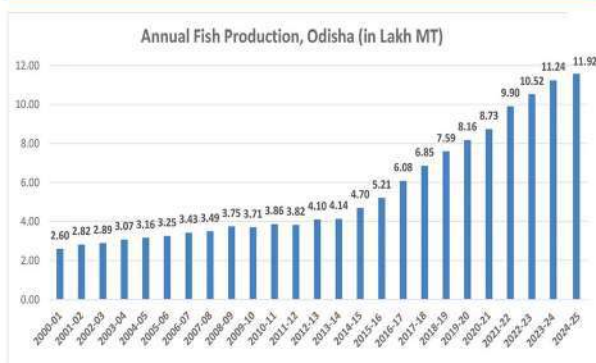

## Fish Production, Export and Consumption

Odisha is the fourth largest fish producing state accounting for 6 percent of total fish production in India following Andhra Pradesh, West Bengal and Karnataka. The State's fish production, encompassing both inland and marine resources, has grown significantly at 6.08% in 2024-25 over the previous year against a 4.1 % growth rate at the National level. In the last 5 years, the fish production has increased at a CAGR of 8.14% against 6.6% at the India level. During last five years, fresh water fish production has increased by 8.08% CAGR, brackish water fish production by 7.73% CAGR and marine catch at a CAGR of 8.61%.

There is a four-fold increase in total fish production in the State recorded fish production of 11.92% LMT during FY 2024-25 with a Compound Annual Growth Rate (CAGR) of 6.78% over the last 21 years (from 2.60 Lakh metric tons in 2000-01 to 11.92 lakh metric tons in 2024-25). It contributes 2.09% (A) to the Gross State Value Added (GSVA) during 2024-25.

- CAGR OF FISH PRODUCTION IS 6.6% OVER 23 YEARS
- CAGR OF FISH PRODUCTION IN LAST 9 YEARS IS 10.07%

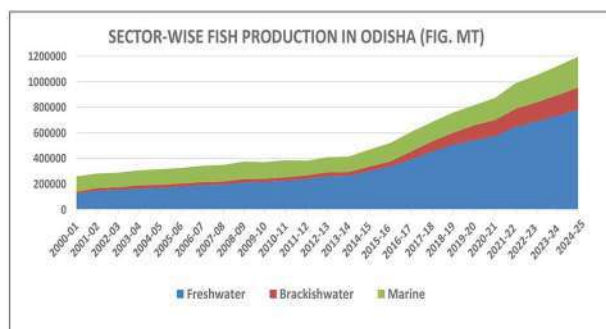

The fresh water fisheries sector has shown consistent growth in fish production over the last 23 years with about 8% CAGR. It has grown about 6-fold from 1.25 lakh metric tons in 2000-01 to 7.83 lakh metric tons in 2024-25. The growth in fresh water fish production gained momentum in 2015-16.

It increased with a CAGR of 9.94% over the last 9 years and more than doubled from 3.36 lakh metric tons in 2015-16 to 7.83 lakh metric tons in 2024-25. In the last two decades, the fish productivity in fresh water culture tanks has increased by two folds from 1.85 metric tons/Ha/ Year in 2001 to 4.54 metric tons/ Ha/ year during the FY 2024-25.

The brackish water fisheries sector has remarkably grown by 12 times over the last 23 years from 13,442 metric tons in 2000-01 to 1,68,909 metric tons in 2024-25 with a CAGR of 12.07%. Over the last 14 years, the farmed shrimp production from brackish water tanks has increased from 11,629 metric tons in 2010-11 to 1,27,875 metric tons in 2024-25 with a CAGR of 14.47%. In the last two decades, the brackish water productivity in culture tanks has increased by two folds from 3 metric tons/Ha/ Year in 2001 to 5.45 metric tons/ Ha/ year during the FY 2024-25.

In the marine fisheries sector, there was sustainable harvesting of marine fishery resources with a production growth from 1.21 lakh metric tons in 2000-01 to 2.39 lakh metric tons in 2024-25. However, there is scope to further enhance marine fish production in the State beyond Maximum Sustainable Yield (MSY) level of 2.93 Lakh metric tons with proper management measures (Source: Fishery Survey of India) through the introduction of Deep-Sea Fishing Vessels.

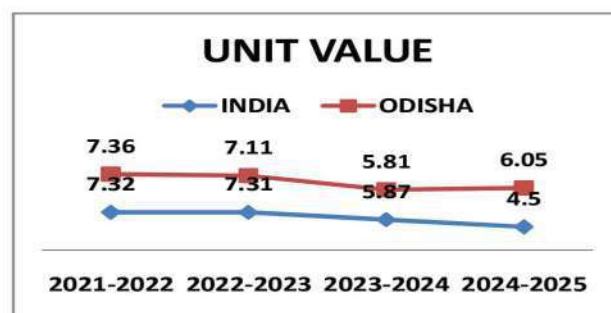

Odisha plans to enhance Monitoring, Control and Surveillance (MCS) capability for preventing and controlling IUUC fishing (Illegal, unreported and unregulated fishing) by installation of 2083 transponders covering all registered Mechanized boats. Also, a step has been initiated for enhancement of natural productivity of territorial water through deployment of Artificial reef at 93 sites along the coast.

### SEAFOOD EXPORTS:

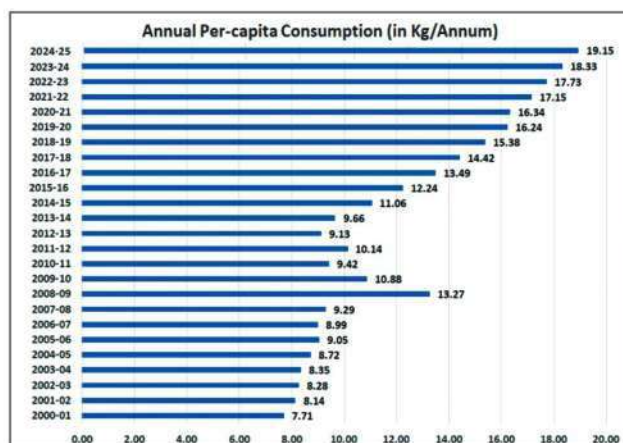

Odisha has extended its wide range of premium seafood products offering to the vast international market, especially to the USA, European Union, ASEAN, Japan, China and the Middle East Asian countries.

There was a spectacular jump in the value of seafood exports from the State i.e. Rs.3243.92 Crore in 2019-20 to Rs.4710 Crore in 2024-25 at a CAGR of 5.07%. Similarly, the quantity of seafood export has increased by 25259 MT from 66,671 Metric Tons in 2019-20 to 91,930 Metric Tons in 2024-25. Tremendous growth in seafood export due to the introduction of an exotic variety of American white legged shrimp called Vannamei (*Litopenaeus Vannamei*). During 2023-24, a new innovative component "Promotion of Aquaculture & Shrimp Export Cell" was added under MMKY for production of value-added seafood products in consultation with MSME and Industry Dept. During the FY 2024-25 the State has noticed enhanced growth rate over the average growth rate at the national level.

### FISH CONSUMPTION:

Odisha has one of the highest fish consuming populations in India. As per the National Family Health Survey-5(2019-21), 94.75% of people in Odisha consume fish. The per-capita fish consumption in the State has increased from 16.24 kg in 2019-20 to 19.16 Kg in 2024-25.

## Fish Consumption In Odisha

94.75% of people in Odisha consume fish (Source: NFHS-5).  
18.33 kg is the per-capita annual fish consumption during 2023-24.

## FISH SEED PRODUCTION:

Fish seed is the primary requisite in the fish farming business. There are 21 nos. of Government fish hatcheries, 49 govt rearing farms and 157 private fish hatcheries in the State. The total fish seed (fry) production has substantially increased from 27 Crores in 2000-01 to 330.23 Crores in 2024-25 due to increased local demand for fish seed caused by crop intensification and increased farm area, modernization of hatcheries and periodical introduction of quality broodstock under a special scheme of the Department. During 2024-25, Government hatcheries produced 215.19 Crores of Spawn and private hatcheries produced 904.10 Crores of Spawn.

## EARLY BREEDING PROGRAMME

### 1. Input assistance to fish seed hatcheries

Promotion of technology for early breeding of IMC is essential in the State to supply sufficient quantity of fingerlings to farmers and fishers to stock their tanks and reservoirs during early monsoon season (July - September). Early breeding of Indian Major Carps (IMC) was successfully achieved for the first time in the

State in April 2020 through appropriate technological interventions in 4 Government Fish seed farms (Kausalyaganga, Chipilima, Bhanjanagar and Saramanga) with technical support from World Fish. During the year 2024-25, Early breeding of Indian Major Carps (IMC) programme was taken up in 5 Government Mega Fish seed farms (Kausalyaganga, Chipilima, Bhanjanagar, Dighirahania and Saramanga) and including Kathpal Government Fish Farm. 102.62 Crore IMC spawn was produced during peak summer month i.e. April-June. The operational private hatcheries from different districts of the state have availed the scheme benefits and produced 292.30 Cr Spawn during 2024-25 under the Early Breeding program. The total spawn production from early breeding during the FY 2024-25 was Rs 394.92 Cr. spawn.

### 2. Input assistance to the Network of Seed Growers

The Department has taken steps for year-round availability of quality sizable fish seed before commencement of pisciculture season with onset of monsoon from Government and private hatcheries in the State through establishment of a network of seed growers in all districts at the doorstep of farmers. The private seed growers who have a perennial fish pond can grow this early breeding spawn and make the fingerlings available to the farmers during July-September. A new scheme to provide input support to fish seed growers has been introduced by the -

F&ARD Department, which intends to grow advanced fingerlings (above 100 mm) in 3-4 months of the seed rearing cycle. Fish farmers, WSHGs, PFCS and private entrepreneurs and enterprises/ Institutions across the state are to be encouraged. The scheme supports maximum area of 5 Acres or 25 numbers of biofloc tanks having 375 cubic meter water area per beneficiaries. During the year 2024-25, the Department has covered 3371.61 Acres of ponds against the target of 4000.00 acres with subsidy assistance of 40% to the General category and 60% to the SC/ ST/ PwD/ transgender/ Women categories. This program ensured year-round availability of seed as stocking material for pisciculture activities.

## **A. DEVELOPMENT OF INLAND FRESH-WATER FISHERIES SECTOR**

### **1. Women Empowerment through Fisheries activities**

#### **(a) Input assistance to Women**

##### **Self Help Groups for pisciculture in GP tanks**

The programme of “Input assistance to Women SHGs” for pisciculture in GP tanks” is being executed since its inception from 2017-18. The project is being carried out successfully along with the other converging departmental actors viz., FARD, Mission Shakti and PR&DW Department. The program provides an input subsidy of 60%, 50% & 40% on the Rs.4.00 Lakh/ Ha for WSHGs who have been tagged with GP tanks on a long-term lease basis and practicing pisciculture for three consecutive year. Odisha has about 78,000 Gram Panchayat Tanks (68,000 Ha), most of which remain un-utilized or under-utilized with regards to its potential. Odisha has around 7 lakh Women SHGs with over 60 lakhs of members. Capitalizing on this opportunity, Government took up the task of scientifically producing fish in the Gram Panchayat (GP) Tanks by the WSHGs and providing them the income opportunities since 2017-18, by bringing out a long-term (3-5 years) leasing policy of the GP Tanks across the 30 districts in the State.

### **Inter-Departmental Convergence & Policy reforms**

About 78000 under- utilised GP tanks of covering WSA 68000 ha (Appx.) in Odisha are being put to use for fish production. GPs under Panchayati Raj and Drinking water Department (PR&DW) have around 7 lakh Women SHGs (WSHG) with a membership of 60 Lakh women. These WSHGs are registered and organized under Department of Mission Shakti. Since inception of the Scheme (from 2017-18), in total, 22,705 nos. of GP tanks with a total water spread area of 20542.74 Ha were brought under scientific fish farming with involvement of 21900 nos. of WSHGs under this scheme with long-term leasing policy of the State.

For the year 2024-25 a total of 10,244 WSHGs have carried out pisciculture in 10081.80 Ha. GP Tanks.

#### **(b) WSHGs in Fish Drying:**

In the financial year 2024-25, a new component was introduced to support WSHGs in producing high-quality, hygienic dry fish by providing solar dryers at a subsidized rate.

### **2. Matsya Pokhari Yojana (MPY)**

Machha Chasa Pain Nua Pokhari khola Yojana" or more popularly known as the "Matsya Pokhari Yojana" (MPY) was introduced since FY 2017-18, with a mandate to popularize scientific pisciculture in the State to increase its fish production thereby doubling the farmer's income.

To achieve this goal, a horizontal expansion of the activities was thought of by creating new tanks & ponds in private land to carry out intensive aquaculture & give a boost to income generation and entrepreneurship among the farmers and youth. Since the last three years, 4149.51 Ha of new fresh water fish tanks have been developed under this scheme and 816.82 Ha of existing tanks were supported with input assistance in order to bring the unutilized private tanks to the fold of intensive aquaculture. During 2024-25, 881.98 Ha. of new tanks have been excavated & 1344.67 Ha. of existing tanks till now have been provided with input assistance for intensive pisciculture with financial assistance of 50% & 40% to SC/ ST/ Women/ PWD/ Transgender and the general category beneficiaries respectively.

### 3. Input Assistance to farmers for taking up pisciculture in the Agriculture Farm ponds

It is crucial to extend help to the farmers who are small/marginalized. In that regard, agricultural farm ponds are being developed in Odisha under MGNREGA by the Directorate of Soil Conservation and Watershed Development Department. These ponds act as a reservoir of water utilized to irrigate the farmer's agricultural land during the time of exigency. These same ponds also possess a potential to be utilized for not only raising fish fingerlings but also rearing the fish to its marketable size based on the water retention capacity. For the FY 2024-25 the Department of Fisheries & ARD has provided input assistance to 4646 nos. of farmers for facilitating production of fingerlings and table size fish too.

### 4. Promotion of Intensive Aquaculture through introduction of Bio-floc Technology in Fisheries

This is a kind of aquaculture system which needs a limited water exchange in which the fish is cultured at high stocking density, where the nitrogenous waste materials of fish can be re-utilized to produce feed for fish in the form of bio-floc. This floc is produced with a strong aeration and biota is formed in the water in the culture tank. It is a cost-effective technology in which the toxic materials from the fish and shellfish, such as nitrate, nitrite and

ammonia, can be converted to a useful product, proteinaceous feed. This advanced technology of pisciculture was introduced to provide support to the promising entrepreneurs, job seekers like youth and interested progressive fish farmers since 2020- 21, thereby increasing the fish production and to achieve self-sufficiency in the State. This scheme Promotion of Intensive Aquaculture through bio-floc technology for intensive farming of shrimp and fish provides financial assistance of 60% and 40% to the SC / ST / Women / P w D / Transgender beneficiaries and the General category people respectively with an option for 2, 4 or 6 tanks under State Plan Scheme. During FY 2024-25 5000 tanks have been developed.

### 5. Promotion of Species Diversification through Genetically Improved Farmed Tilapia (GIFT):

Tilapia is the best suitable candidate fish which fits into the requirement to bridge the gap in terms of nutritional benefits that it has to offer, and secondly, the quantity one gets access to per head at a lesser price. This makes it the best suitable candidate of fish to be utilized to

address the food and nutritional security. The wild variety, like *Oreochromis mozzambicus*, has now been replaced by Genetically Improved Farmed Tilapia (GIFT) which is a genetically improved variety of Nile Tilapia (*Oreochromis niloticus*) developed by WorldFish, Malaysia over the last 4 decades by employing selective breeding technology.

The production of GIFT Tilapia seeds has been started from the state-of-the-art "GIFT Tilapia Hatchery and Multiplication Centre" at the Government Fish Seed Farm in Kausalyaganga. Selected farmers are provided hand-holding support for proper implementation of Better Management Practices (BMPs) and assisting farmers to market the tilapia in local fish markets. Proper biosecurity measures are assured during the culture period as per the guidelines of the Government of India. During the FY 2024-25 from the state-of-the-art "GIFT Tilapia Hatchery and Multiplication Centre" at the Government fish seed Farm, Kausalyaganga, Bhubaneswar 5.16 lakh mono-sex seed has been produced and distributed across the State and to the other States as well.

#### **6. Enhancement in reservoir fish production and productivity:**

Reservoirs are known as sleeping giants and their potential can only be realized when it is harnessed properly by following a process of reservoir stocking. 436 lakh fingerlings along with 67.10 lakh fresh water prawn juvenile would be stocked, which aims to enhance productivity up to a level of 412kg/ha/year during FY 2024-25 in all 128 reservoirs of 20 districts from the Govt and private fish farms. This kind of stocking program will go a long way in maintaining the fish stock in the reservoir as well as will help 8000 families by providing a source of livelihood.

#### **7. Installation of cages in the Reservoir of Odisha**

Private entrepreneurs/companies in partnership with PFCS / SHG are encouraged for reservoir cage culture through a "lease-install-operate basis". Specific guidelines prepared for "Guidelines for taking up Reservoir cage culture by PFCS / SHG/ Private Entrepreneurs/ Companies" to promote cage in reservoirs of Odisha sustainably and in harmony with local PFCS. Based on NFDB guidelines on Cage Culture, the cage zone mapping was done using GIS application in 6 nos. reservoirs of Odisha. In the Hirakud reservoir of Sambalpur District, a total of 2 clusters covering 31 zones and 620 sub-zones have been finalized. Four hundred four entrepreneurs were allotted with sub-zones out of which, MoU was done with 177 entrepreneurs with installation of 206 circular cages and 1330 rectangular cages.

#### **8. World Bank Assisted OIPCRA Project:**

Like previous years, the FARD continued with the implementation of the World Bank assisted Odisha Integrated Irrigation Project for Climate Resilient Agriculture (OIPCRA), a project under the Department of Water Resources which will be continued for five years since its inception to aid in the overall development of the fishery sector in the State. Under the World Bank assisted OIPCRA project, it is planned to promote (i) species diversification in freshwater aquaculture sector through polyculture of IMC with Amur carp, minor carps and freshwater prawn (ii) monoculture of GIFT tilapia and pangasius in order to enhance the fish productivity income and resilience of farmers. This activity will be taken up in private tanks belonging to eligible existing fish farmers

entrepreneurs and individuals who have newly entered fish farming in 15 OIIPCRA districts during 2021-22 to 2024-25. The key focus area of the OIIPCRA is "Climate-Smart Intensification and Diversification of Production" and the objective of this component is to intensify production, strengthen farmers' capacity to adapt to climate change stressors affecting crop and aquaculture production, and diversify production, especially during Rabi season in response to effective market demand. Under the scheme, farmers will be financially supported to implement the polyculture system by providing financial assistance for farm inputs (100% assistance to all) in a demonstration mode. During the FY 2024-25, 1021 beneficiaries and 33 WSHGs/ Pani Panchayat/ WUGs/ PFCS benefitted under the OIIPCRA project with utilization of Rs.16.00 Cr for development of fisheries units under the program. The major highlights for the year were pilot demonstration of Paddy-cum- Fish farming in Kalahandi and Mayurbhanj districts.

## B. DEVELOPMENT IN BRACKISH WATER SECTOR

The State have around 4.18 lakh Ha. of total brackish water areas, including the existing shrimp culture area, estuaries, Chilika and backwaters. At present, the area under brackish

water aquaculture is around 19,410 Ha. The Coastal Aquaculture is regulated and managed as per the norms of the Coastal Aquaculture Authority (CAA) Acts, Rules & guidelines. It is mandatory to register all the upcoming farms and renewal of license of existing farms under the CAA Act, 2005 & CAA (Amendment) Act, 2023.

In the year 2024-25, brackish water area development was undertaken under the State Plan Scheme MMKY and the Centrally Sponsored Scheme PMMSY, providing subsidy assistance of 40-60% of the project cost for various beneficiary categories. During this period, 348 beneficiaries excavated a total of 419.19 hectares.

In the financial year 2024-25, **498 farmers** covering **306.35 hectares of WSA** obtained new registrations, while **1,238 farms** covering **1036.15 hectares of WSA** had their licenses renewed. Additionally, proposals for **183 farms** covering **120.28 hectares** for new registration and **1,760 farms** covering **1,382.99 hectares** for license renewal were sponsored to the CAA for approval.

## C. DEVELOPMENT IN MARINE SECTOR

Odisha is situated on the coast of Bay of Bengal and holds an excellent scope for fisheries development. It has a coastline of 575 km with a continental shelf area of 24000 km<sup>2</sup>. The State has six marine districts namely Balasore, Bhadrak, Kendrapara, Jagatsinghpur, Puri and Ganjam. The coastal and offshore waters of Odisha form a rich abode of quality pelagic and demersal resources. According to the richness of demersal stock along the northeast coast of India, Orissa ranks first in capture of demersal stock through bottom

trawling, followed by Andhra Pradesh and West Bengal. A large part of this oceanic stocks however is protected or only fished for part of the year due to imposition of fishing restrictions on mechanized and motorized fishing boats for 7 months (November to May every year) for protection of Olive Ridley turtle and 61 days (April 15th to June 14th every year) Uniform fishing ban imposed on mechanized vessels and motorized fishing vessels above 8.5 mtrs. The imposition of these ban periods restricts the growth of marine fisheries to a large extent.

### 1. Implementation of Odisha MFRA:

The Odisha Marine Fisheries Regulation Act, 1981 and the Orissa Marine Fishing Regulation Rules, -1983 regulate the marine fishing, conservation and management of marine fisheries resources within the territorial limit of the State safeguarding the livelihood of marine fishers. The Registration, Licensing and Renewal of fishing vessels, enforcement, adjudication, and fishing ban are also regulated under the Act & Rules. Steps are being taken for Amendment of OMFR Act.

### 2. Popularisation of Fishery Machinery/ Equipment

This MMKY scheme component encourages the use of various machinery and equipment like aerators, air blowers, fishing nets, bio-security nets, trawl net, Genset, solar based smart technologies, automated feeder, live fish/seed transport vehicle and ice box to improve fish production and productivity covering marine, inland & brackish water aquaculture with an admissible subsidy of 40% for all categories. 2912 nos of equipment have been distributed during FY 2024-25 with provision for distribution of 3622 nos of equipment.

### 3. Motorization of Traditional Craft

"Motorisation of traditional craft" introduced during the year 2021-22 has been carried under the State Plan umbrella scheme "MMKY"- to increase the Catch per Unit effort of fishing boats and increase the marine fish production of the State and increase the income and livelihoods of traditional fishermen by motorizing their traditional non-motorized crafts and 5-year-old motorized fishing boats. Provision is made to provide marine fishermen OBM engine and IBM engine (upto 100 HP) with subsidy assistance of @ 40% for General Category and @ 60 % for SC/ST/Women/ PwD/ Transgender category. During the FY. 2024-25, 749 nos of marine fishers were supplied with marine engines.

### 4. Support to Coastal communities for Marine Fisheries for obtaining New Boat, Engine and Net

Under this State Plan scheme provision is made to provide a new wooden /FRP Boat with Engine and purchase a new fishing net to eligible beneficiaries at unit cost of Rs.10.00 Lakh. Subsidy assistance is provided @40% for General Category and 60% for SC/ST/Women/ PwD/ Transgender category. During FY 2024-25, 569 units of boats, Net engines have been supplied to Marine fishers.

## 5. Assistance for Fish Transport Infrastructure

This programme aims at providing transport infrastructure, i.e. Insulated Vehicle, Auto with Ice Box and Motorcycle with Ice Box for maintaining an effective cold chain transport system and supply of fresh fish to consumers. The admissible subsidy as per the present funding pattern is 40% for the General category and 60% for SC/ST/Women beneficiaries. During the FY 2024-25, 15 nos Insulated Van have been provided for ease of marketing.

## 6. Livelihood and nutritional support for conservation of fisheries resources during fish ban/lean period

Uniform Fishing Ban is imposed in the State every year from April 15th to June 14th (61 days). To provide livelihood support to fishers during the ban period, Rs 3000/- assistance (CS- Rs 1500/-+ SS Rs 1500/-) is provided to fishers for their deposit of Rs 1500/- across 9 months. During FY 2024-25, 13047 no's fishers would avail the benefit during April 2025 after deposit of the beneficiary share by March 2025.

### D. INFRASTRUCTURE DEVELOPMENT:

In the year 2024-25, the State Cabinet approved the implementation of the State Plan Scheme "Infrastructure Development" for a three-year period, with a budget allocation of ₹696.21 crore. The scheme aims to develop 619 projects, including the construction and modernization of fishing harbors, fish landing centers, wholesale and retail hygienic fish markets, office buildings and farm renovations.

These projects will be executed in a phased manner. For the year 2024-25, ₹69.50 crore has been allocated for implementing these infrastructure facilities. Additionally, provisions have been made under the non-beneficiary component of the Central Sector Scheme for the development of various infrastructure projects. Initiative have been taken during FY 2024-25 under State plan Infrastructure development scheme for Construction of 3 Fishing Harbors, 15 Fish landing centers, 2 wholesale fish markets, 1 Fisheries Training center, 36 Fish Retail market, upgradation of 4 nos of FH/ FLC, development of 06 brackish water cluster in these 3 years.

The construction of 3 FLC at Kalupadaghat, Sorana and Kasia is in progress. 7 nos of water, soil testing & disease diagnosis laboratories have been made operational. Steps are being taken for the supply of 30 no's of Mobile Disease and Soil & Water testing laboratory for providing facilities at the doorstep of farmers.

### UNDER PMMSY

- Construction of the State of the Art-wholesale Fish Market (Rs 78.25 Cr.) at Basta, Balasore
- Construction of Fishing Harbor at Chandipur Balasore (Rs 77.50 Cr.).
- Development of State of the Art-Integrated Aqua park at Sambalpur (Rs 100.00 Cr.)
- Deployment of Artificial Reefs at 93 sites
- Installation of Transponders in 2083 Mechanized Fishing Boats.

### UNDER STATE PLAN

- Construction of Fish Landing Centres:
  - Kaluparaghat (PC:17.62 Cr)
  - Sorana (PC:18.63 Cr)
  - Kasia (PC:16.36 Cr)
- Huma Whole sale Dry Fish Market (Rs4.21 Cr.)
- Development of OSSPARC Hatchery for sea bass fry and monodon PL production- (Rs 20.94 Cr.)

- Development of GIFT satellite center at Bomlai, Sambalpur- Rs 80 lakh
- Construction of Fisheries Officer Training Institute (FOTI) at Kausalyaganga, Bhubaneswar- (Rs 14.95 Cr.)
- Development of Hygienic Fish Market:
  - Talabania, Puri (Rs 7.99 Cr.)
  - Boudh (Rs 4.11 Cr.)
  - Athagarh (Rs 3.6 Cr.)
  - Parlakhemundi (Rs 3.42 Cr.)
  - Remuna (Rs 5.35 Cr.)

### E. MUKHYAMANTRI KRUSHI UDYOG YOJANA (MKUY)

The State Government had launched the modified/revised guidelines on Commercial Agri Enterprises (CAEs) implemented as Mukhyamantri Krushi Udyog Yojana (MKUY) which was in effect since June, 2018. MKUY envisages the ease of doing agribusiness through process simplification of CAE

implementation modalities by making it online in a simple, transparent and time bound manner at all the stages, especially for the growth and benefit of farmers & agricultural entrepreneurs of the state.

The assistance for establishment of commercial Agri-enterprises is 40% of the fixed capital investment (excluding the cost of the land) subject to a maximum limit of Rs. 1.00 Crore for general entrepreneurs and 50% of the fixed capital investment (excluding the cost of the land) subject to a maximum limit of Rs. 1.00 Crore for SC/ ST/ Women/ Transgender/ Persons with disability (PWD)/Graduates of Agriculture & Allied disciplines. Under the Fisheries sector, 13 units were developed worth Rs. 2.11 Cr with assistance under MKUY during FY 2024-25.

### F. PRADHANMANTRI MATSYA SAMPADA YOJANA(PMMSY)

Pradhan Mantri Matsya Sampada Yojana (PMMSY) scheme was launched by the Government of India to bring about Blue Revolution through sustainable and responsible development of fisheries sector in India" with an

estimated investment of Rs.20,050 crores. The Centrally sponsored scheme (CSS) component is further segregated into non-beneficiary and beneficiary-oriented sub-components/ activities under the following three broad heads: (i) Enhancement of Production and Productivity, (ii) Infrastructure and Post-harvest Management, (iii) Fisheries Management and Regulatory Framework.

Under this scheme, over the past five years, Administrative Approval amounting to ₹1,138.68 crore has been granted for the implementation of 40 beneficiary-oriented components and 13 non-beneficiary-oriented projects. The funding includes a Central Share of ₹464.26 crore, a State Share of ₹312.29 crore, and a Beneficiary Share of ₹362.11 crore. In the financial year 2024-25, an amount of ₹83.33 crore has been allocated.sanctioned, out of this Rs. 57.05 Cr has already been utilized so far. under GAIS 11,31,857 nos. of fishers covered in CSS-PMMSY.

### G.ODISHA FISHERIES COOPERATIVE CORPORATION LTD. (FISHFED)

#### Registration of Co-operatives:

The Primary Fisheries Cooperative Societies (PFCSSs) and Central Fisheries Cooperative Societies (CFCSSs) are to be enrolled as members / affiliated with the FISHFED. As per the Govt. registration under OCS Act 1962 there are 783 nos. of PFCSSs and 5 CFCSSs.

#### Fish on Wheels:

16nos. ready to eat Canteen Van "Fish on Wheels" are being operated at Bhubaneswar & Berhampur Municipal area to provide ready-to-eat fresh, hygienic and nutritious fish & fishery products to the consumers at their demand of places.

#### Management and Maintenance of Fish Landing Centres & Jetties:

Fisheries & ARD Department has been pleased to hand over the existing Jetty and Fish landing Centres to FISHFED for its management. In this regard, the Director of Fisheries has already handed over 24 nos. of FLC and Jetties to FISHFED for its operation and management. At present, Bahabalpur FLC and Balugaon FLC are

being managed by FISHFED and other Jetties are being managed by local PFCS through FISHFED with the provision of all basic facilities for the development of fishermen community at the base site.

#### **Operation of Modern Fish Selling Retail Outlets:**

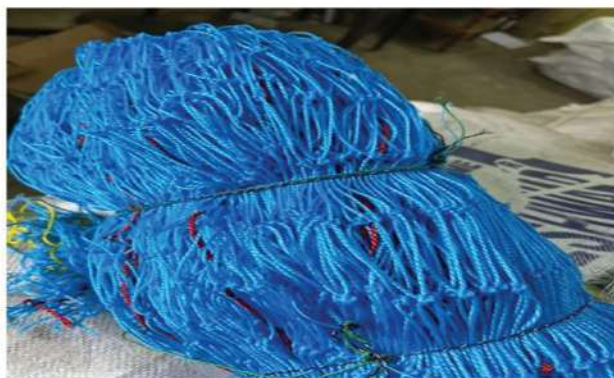

FISHFED has its own three nos. of "Chilika Fresh Kiosks" at Siripur, CRP Square, Sahid Nagar in Bhubaneswar. 13 nos. of Modern and Hygienic Chilika Fresh are being operated by M/S Falcon Marines Exports Ltd. in PPP mode inside Bhubaneswar Municipal Corporation area & one number of CHILIKA FRESH at Nayagarh town operated in PPP mode.

### **H. ODISHA PISCICULTURE DEVELOPMENT CORPORATION LTD. (OPDC)**

Odisha Pisciculture Development Corporation Ltd. was established in 1998 and is engaged in

- ▶ Production and supply of the best quality fish seed to fish farmers of Odisha as well as outside the State.
- ▶ Production and sale of high-quality nylon and HDPE fishnet webbings for farmers and fishermen of the State; The OPDC Net manufacturing unit is located at Mancheswar,

Bhubaneswar. Its main function is the production and marketing of fishing nets of various specifications. This unit produces net webbings of different types such as Nylon mono-gillnet, HDPE net, fish dragnet, nylon multifilament webbings etc. These types of nets are being supplied to fishermen of Odisha under various subsidy schemes such as Popularization of Fishery machinery, OIIPCRA, Assistance to WSHGs, etc

- ▶ Sale of quality fuel, High Speed Diesel (HSD), Motor Spirit (MS) and lubricants to fishermen community operating trawlers, boats as well as surface transporters.
- ▶ Scope to enter into other businesses for the development of the fisheries sector, which will make the corporation stable and sustainable.
- ▶ OPDC has five self-owned Fish Seed Hatchery Projects (FSHP) and 21 departmental farms which are on lease for fish seed production meeting the requirements of the fish farmers of the State.
- ▶ Further, OPDC operated eight numbers of HSD & MS outlets along the coast, supplying quality fuel and other lubricants meeting the requirements of fishermen venturing into the sea for fishing as well as surface transporters for minimizing post-harvest loss, which have been established along the coast.

### **I. INFORMATION, EDUCATION & COMMUNICATION**

The "Information, Education, and Communication" (IEC) programme aims to educate fish farmers, fishermen, aquapreneurs, WSHG members across the state to adopt modern scientific culture practices, enhancing the fish production and productivity of the State. To disseminate various activities under the State

Sector umbrella scheme MMKY and the Centrally Sponsored Scheme "PMMSY", there is a need for IEC programmes for awareness among the people. Various flagship components under MMKY were popularized through various electronic & print media through the Poster, Banner, Hoarding, etc. During the FY 2024-25, a budget of Rs 15 Cr. has been earmarked for executing all these activities. Various IEC activities undertaken are detailed below:

### IEC Activities under Electronic, Print & Social Media

Television and radio play a vital role in spreading messages statewide. To reach fish farmers & fishermen, the TV commercials, spots, and radio jingles on pisciculture activities were aired on regional channels, Doordarshan, FM Radio, and All India Radio. Advertisements in major Odia newspapers and social media have enhanced the awareness among the public on the Government schemes and programs.

During 2024-25, under IEC, dissemination of various Fisheries sector schemes and activities was broadcasted through Print & Electronic media. The State sector umbrella scheme MMKY has been reached to the people across the State through a Newspaper advertisement. Different IEC materials containing scientific pisciculture practices, scheme guidelines, promotional events have been uploaded in different social media platforms (Facebook, X, Instagram, YouTube).

### FAIRS/WORKSHOP

#### Krushi Odisha

Exhibition of Fisheries activities was showcased in the State Agriculture Fair- "Krushi Odisha-2025". Fisheries stalls, live models & live fish demonstration were successfully

showcased in the fair. The Fisheries stall of the Directorate of Fisheries received the 3rd best prize in the Government. stall category.

### District level Matsya O Pranee Sampad Mela

District level fisheries and animal resources development fair "Matsya O Pranee Sampad Mela (MOPSM)" was organized in all districts of the state during October to December, 2024 with activities like general meetings, farmers-scientists interaction, exhibitions, live demonstration of fish, livestock & birds and cultural programmes, the fairs created mass awareness among fishers, fish & livestock farmers on adoption of scientific farming practices through use of modern technologies. Around one lakh visitors witnessed the exhibition, and more than a hundred fish farmers/Entrepreneurs/ WSHGs got felicitated in MOPSM.

### Tableaux showcase on Republic Day 2025

The Department showcased fisheries activities via the Tableaux on 26.01.2025 with the theme "FARM to PLATE".

## Section B

# Animal Resources Development Sector

## HIGHLIGHTS 2024-25

### PRODUCTIVITY ENHANCEMENT SERVICES IN MAYURBHANJ DISTRICT

The Hon'ble President of India has launched the cow induction programme under "Productivity Enhancement Scheme" (PES) of Rashtriya Gokul Mission (RGM), "Gift milk programme" & "Market Support Programme of NDDB for OMFED" in virtual mode on 13.01.2025 in the presence of Hon'ble Chief Minister and other dignitaries. The key activities under the scheme includes supply of 3000 young heifer/ adult dairy animal (cow / buffalo), induction of 60 Multi-Purpose Artificial Insemination Technicians in Rural India (MAITRI), taking up 50,000 Artificial Insemination ( AI) utilising Sex Sorted Semen to boost dairy development in Mayurbhanj district.

### MUKHYAMANTRI KAMADHENU YOJANA (MKY)

A new State Sector umbrella Scheme 'Mukhyamantri Kamadhenu Yojana (MKY)' was placed in the Cabinet and has been approved by the Cabinet. This scheme will be implemented in the State for five years from FY 2024-25 to FY 2028-29 with budgetary outlay of Rs.1423.47 Cr. Under this scheme subsidy @ 60-70 % is provided for livelihood support in sub-schemes like Gopalan Yojana, Mahishi Palan Yojana, @ 50% for Fodder Entrepreneurship scheme & @ 85% of premium

cost for livestock insurance under Gosampad Bima Yojana for the first time. For the FY 2024-25 budget provision of Rs. 167.01Crore has been made. This scheme aims to increase the milk production of the State benefiting 15,47,837 farmers in five years, thereby increasing their income.

### MONSOON MEET - 2024

Odisha proudly hosted the Monsoon Meet-2024 of Department of Animal Husbandry & Dairying, Government of India for the first-time, bringing together Hon'ble ministers and senior officers from Government of India and different States & Union Territories to deliberate on crucial matters related to animal husbandry & dairying on 13th September 2024 at Convention Centre, Lokaseva Bhavan, Bhubaneswar. The Hon'ble Chief Minister of Odisha Shri Mohan Charan Majhi graced the occasion.

### REGIONAL REVIEW MEETING OF EASTERN STATES 2024

The Regional Review Meeting of Eastern States 2024 of Department of Animal Husbandry & Dairying, Govt. of India was held at Hotel Vivanta, Bhubaneswar, Odisha on 12<sup>th</sup> September 2024. It was aimed to discuss strategies, challenges and opportunities in animal husbandry and dairying sector.

The meeting was chaired by the Union Secretary, Department of Animal Husbandry & Dairying, Smt. Alka Upadhyaya.

Senior officers from Animal Husbandry Departments of the participating states of Bihar, Jharkhand, Odisha & West Bengal deliberated on promoting synergies for growth and development of the sector.

### **MOU WITH NATIONAL DAIRY DEVELOPMENT BOARD (NDDDB)**

MOU signed between F&ARD Deptt. and National Dairy Development Board (NDDDB) in presence of Hon'ble Chief Minister towards strengthening of State milk cooperative and boosting milk production & Animal husbandry activities in the State.

### **PRANI SAMPAD SAMRUDDHI YOJANA (PSSY)**

The new State Sector umbrella Scheme “Prani Sampad Samruddhi Yojana (PSSY)” was approved by the State Cabinet. The scheme has two sub schemes “Poultry Development” & “Small Animal Development” The approved sub-scheme “Poultry Development” will be implemented in the State for 5 years from the FY 2024-25 to 2028-29 with a total budget outlay of Rs. 1031.1936 Crore. This scheme aims at benefiting 3,73,928 farmers including WSHGs. There will be an additional production of about 95.58 TMT meat per year & 5.5 lakh eggs per day upon implementation of the scheme.

### **GOMATA**

This new scheme was approved by the State cabinet for 3 years with a cost of Rs 345.60 Cr. This scheme will benefit the farmers through better veterinary service delivery by supporting about 2.5cr preventive vaccination & 1.3cr treatment of livestock annually.

### **GOPAL RATNA AWARD**

On National Milk Day Shri Bhaskar Pradhan of Subarnapur district won the National Gopal Ratna Award 2024 for Best Artificial Insemination Technician (AIT). This is the third time in a row that Odisha has earned this prestigious award. This award is a true statement to his dedication to dairy excellence.

### **A-HELP**

A-HELP (Accredited Agent for Health & Extension of Livestock Production), a new band of community workers in livestock sector was launched by Hon'ble Chief Minister, Odisha & Union Minister Fisheries, Animal Husbandry and Dairying and Panchayati Raj on 13.09.2024. A-HELP worker will be the first port of call for any health-related demands of livestock population of that village, especially in the GPs where the Govt. Veterinary Institutions/ OMFED AITs/ MAITRIs are not available. 2000 A-HELP workers will be engaged initially to fill this void.

The animal husbandry sector plays a crucial role in Odisha's economy, contributing approximately 2.60 % to the state's Gross State Value Added (GSVA) in 2024-25 (AE). It has emerged as a key driver of economic growth, especially in rural areas. The livestock industry significantly supports the economy through the production of milk, meat, eggs, and other animal-based products. Additionally, it generates employment for millions, particularly small and marginal farmers, landless laborers and women, thereby contributing to poverty alleviation and rural development. A well-established network of 58 Veterinary Hospitals, 483 Veterinary Dispensaries, 314 Mobile Veterinary units & 3239 Livestock Aid Centers ensures the provision of animal health care services, including disease diagnosis, treatment, and prevention. These facilities also offer advisory services on vaccination, breeding, and nutrition to safeguard the livelihoods of farmers and livestock owners.

This report outlines the key achievements and initiatives undertaken by the Fisheries & Animal Resources Development Department during 2024-25 to promote sustainable growth in the animal husbandry sector, enhance livestock productivity and health and improve the livelihoods of farmers and animal caretakers across Odisha.

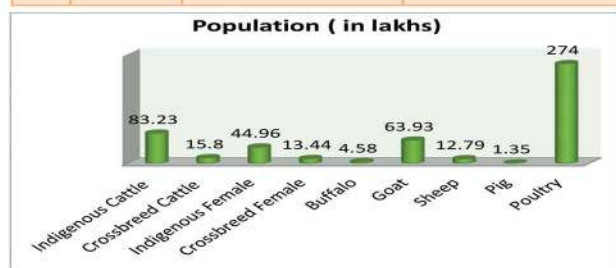

## RESOURCES

### 1. Livestock Resources:

With 182 lakhs livestock population and 274 lakhs poultry population, the state shares 3.39% of livestock and 3.22% of the poultry population of the country. With a share of over 55% of the total livestock population, cattle form the largest share of the livestock population of the State.

| Sl. no | Species | Population in lakhs |
|--------|---------|---------------------|
| 1      | Cattle  | Indigenous          |
|        |         | 83.23               |
|        |         | Crossbreed          |
|        |         | 15.80               |
|        |         | Total Cattle        |
| 2      | Buffalo | Indigenous          |
|        |         | 44.96               |
|        |         | Crossbreed Female   |
| 3      | Goat    | 13.44               |
|        |         | Female              |
| 4      | Sheep   | 4.58                |
| 5      | Pig     | 63.93               |
| 6      | Poultry | 12.79               |
|        |         | 1.35                |
|        |         | 274                 |

### II. Institution al Resources:

The Animal Resources Development Sector plays a crucial role in enhancing dairy farming, poultry, small animal husbandry, fodder production and animal welfare. It also focuses on the prevention and control of animal diseases, including zoonotic infections like bird flu, anthrax and brucellosis. With a well-structured institutional setup, the sector extends its services with special emphasis on supporting the weaker sections to drive rural development.

| Institution                                                    | Numbers |
|----------------------------------------------------------------|---------|
| Veterinary Hospital / Dispensary (VH/VD)                       | 541     |
| Livestock Aid Centre (LAC)                                     | 3239    |
| Frozen Semen Artificial Insemination Centre                    | 4641    |
| Clinical Investigation Laboratory /State Veterinary Laboratory | 4       |
| Animal Diseases Research Institute                             | 1       |
| District Diagnostics Laboratory                                | 26      |
| Frozen Semen Bank (FSB)                                        | 1       |
| Odisha Biological Products Institute                           | 2       |
| Veterinary Officers Training Institute (VOTI)                  | 1       |
| Department Training centres                                    | 7       |
| Livestock Breeding Farms                                       | 16      |
| Poultry/Duck Breeding Farms                                    | 10      |
| Fodder Farms / Fodder Seed production Farms                    | 21      |

### III. Financial Resources:

The budgetary provision and expenditure made since 2015-16 are as follows.

#### i. Budget Provision under Administrative Expenditure (in Lakh Rs.)

| Sl.No | Year    | Provision | Expenditure |
|-------|---------|-----------|-------------|
| 1     | 2015-16 | 23,978.23 | 23,230.57   |
| 2     | 2016-17 | 26,820.59 | 24,733.16   |
| 3     | 2017-18 | 32,560.21 | 27,682.55   |
| 4     | 2018-19 | 36,272.32 | 28,885.57   |
| 5     | 2019-20 | 36,849.82 | 30,794.52   |
| 6     | 2020-21 | 37,051.63 | 29,935.26   |
| 7     | 2021-22 | 38,861.78 | 32,307.06   |
| 8     | 2022-23 | 39,923.49 | 35,951.85   |
| 9     | 2023-24 | 41,175.71 | 37,627.32   |
| 10    | 2024-25 | 47,494.70 | 43,837.88   |

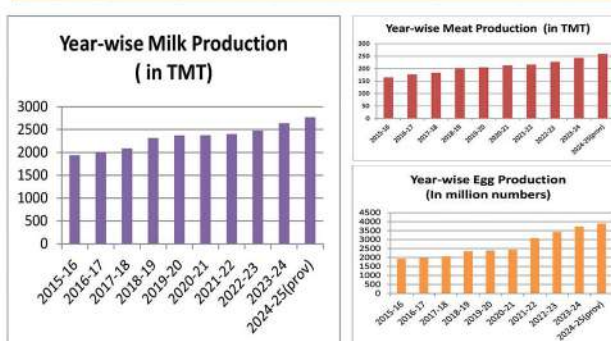

#### ii. Budgetary Provision under Programme Expenditure (in Lakh Rs.)

| Programme Budget Provision & Expenditure (in Lakh Rs.) |            |            |          |              |            |         |                          |            |         |
|--------------------------------------------------------|------------|------------|----------|--------------|------------|---------|--------------------------|------------|---------|
| Year                                                   | State Plan |            |          | Central Plan |            |         | Centrally Sponsored Plan |            |         |
|                                                        | Provision  | Sanctioned | Expend.  | Provision    | Sanctioned | Expend. | Provision                | Sanctioned | Expend. |

## 1. DAIRY DEVELOPMENT

State Govt. has implemented a new scheme “Mukhya mantri Kamadhenu Yojana (MKY)” & was launched in September, 2024 by the Hon’ble Chief Minister, Odisha & subsequently approved by the Cabinet. Then the scheme became live in Go-sugam portal in 1st week of December’ 2024 with the objective to increase milk production in the State with Livelihood promotion & income generation support to the small / marginal farmers benefiting approximately 15,47,837 farmers in five years. The budget provision was made of Rs.1423.47 cr. for 5 years i.e. 2024-25 to 2028-29 in which Rs.167.01 cr. for 2024-25. Under Mukhya mantri Kamadhenu Yojana (MKY) following sub-schemes have been introduced.

### a) Buffalo Entrepreneurship Development Scheme

Under the scheme, beneficiaries are eligible for back ended subsidy @ 70% for SC, ST, PWD, Women & Transgender categories and 60% for General category of the total unit cost for establishment of (1+1) graded Murrah she buffalo. The total unit cost was Rs.2.304 lakhs. The subsidy released to the beneficiary’s bank account through DBT mode in 2 phases by the CDVO on recommendation of the Block Level Inspection Team. The scheme covered all 30 districts of the State.

| Physical Target | Go-ahead letter issued | Beneficiary Benefited |                                              | Funds allotted (in Lakhs) | Funds utilized (in Lakhs) |
|-----------------|------------------------|-----------------------|----------------------------------------------|---------------------------|---------------------------|
|                 |                        | 1 <sup>st</sup> phase | Both 1 <sup>st</sup> & 2 <sup>nd</sup> phase |                           |                           |
| 785 units       | 730                    | 581                   | 534                                          | 1061.13                   | 828.94                    |

### b) Go-Palan Yojana

Under the scheme, beneficiaries are eligible for back ended subsidy @ 70% for SC, ST, PWD, Women & Transgender categories and 60% for General category of the total unit cost for establishment of (1+1) mich cow. The total unit cost was Rs.2.304 lakhs. The subsidy released to the beneficiary’s bank account through DBT mode in 2 phases by the CDVO on recommendation of the Block Level Inspection Team. The scheme covered all 30 districts of the State.

| Physical Target | Go-ahead letter issued | Beneficiary Benefited |                                              | Funds allotted (in Lakhs) | Funds utilized (in Lakhs) |
|-----------------|------------------------|-----------------------|----------------------------------------------|---------------------------|---------------------------|
|                 |                        | 1 <sup>st</sup> phase | Both 1 <sup>st</sup> & 2 <sup>nd</sup> phase |                           |                           |
| 2500 units      | 2875                   | 1776                  | 1638                                         | 3095.08                   | 2503.36                   |

### c) Top-Up Subsidy for Commercial Dairy farming under MKUY.

Under Mukhyamantri Krushi Udyog Yojana (MKUY), 40% subsidy on capital investment is being provided to the general category & 50% subsidy to SC/ST/women/PWD category & agriculture & allied graduate. Additional 15% subsidy on animal cost as Top-Up will be provided to the MKUY entrepreneurs under MKY towards purchase of animals from outside the State.

### d) Female Calf Rearing Scheme

Beneficiary having female calf, born out of AI will be benefited. Under the scheme, 1400 kgs of calf feed at 50% subsidized cost will be provided in 8 phases for 2 years i.e. from 5th months of age to 28th month of age of calf with 100 % subsidy on calf insurance, de-worming & vaccination. The target for FY 2024-25 is 20,000 female calves. Total 11907 no. of female calves have already been selected & benefits are being providing for the year 2024-25.

### e) Go-Sampad Bima Yojana

Under the scheme, beneficiary can insure the milch cows / buffaloes for 1 to 3 years with 85% subsidy on the insurance premium cost. The premium cost for 1 yr is 2.65%, 2 yrs is 4.505% & 3 yrs is 6.36% on animal cost. Total 1,01,829 no. of animals have already been insured for FY 2024-25.

### f) Incentive to Dairy Farmers

Cash incentive up to Rs.5/- per litre of milk has been provided directly to the Aadhar linked bank account of dairy farmers through DBT mode who poured milk at MPCs during lean season i.e. from September 2024 to February 2025. Rs.2858.84 lakh has been paid as incentive to 94254 no. of milk pourers under OMFED for FY 2024-25.

### **g) Strengthening of Dairy Organization (Bovine Breeding Research and Bull Mother Farms)**

Eight Bovine Breeding Research and Bull Mother Farms of the State maintain herd of 845 animals. 5,08,236 litres of milk have been produced during the year 2024-25 & Rs.243.32 lakh revenue have been deposited in the treasury. The native breeds like Sahiwal & Binjharपुरी are maintained in BBR & BM Farm Kuarmunda & Khapuria. The Bovine Breeding Research and Bull Mother Farms of the State are to be strengthened to rear high quality bull mothers of both native and crossbred animals for production of high pedigree donor bulls for FSB and conservation of native breeds.

## **2. SMALL ANIMAL DEVELOPMENT**

### **A sub-Scheme of “Prani Sampad Samruddhi Yojana (PSSY)**

Goat rearing plays a crucial role in sustaining the rural economy, providing a reliable source of income and nutrition for small holder farmers. The Department has introduced breeding programs, small-scale goat & pig rearing activities, taken up veterinary care and disease prevention measures for ensuring sustainable growth in goat farming. Additionally, capacity-building programs have empowered farmers with the knowledge and resources to access better prices, further strengthening their livelihoods and contributing to rural economic stability. The key interventions during FY 2024-25 are as follows.

### **Goat Farming Through WSHGS & Individual Mode:**

In the financial year 2024-25, under the State Plan Scheme, a budget allocation of Rs. 1380.00 lakh has been provisioned for the establishment of 1,000 (30+2) goat units through both Women Self-Help Groups (WSHGs) and individual beneficiaries, with a 50% and 60% subsidy, respectively. As part of this initiative, 928 units have already been established.

### **Small Scale Goat Farming:**

An amount of Rs.1087.05 lakh has been allocated during 2024-25 for establishment of small scale goat units. This scheme supports individual farmers with 60% subsidy for SC, ST, women, transgender and differently-abled beneficiaries and 50% subsidy for general category beneficiaries to establish 1875 small-scale goat units (10 Does and 1 Buck) out of which 1814 units are established.

### **Semi Commercial Pig Farming:**

An amount of Rs. 579.04 lakh is provisioned for Pig rearing. 60% subsidy was provided for SC, ST, women, transgender and differently-abled beneficiaries and 50% subsidy for general category beneficiaries to establish 250 Nos of Semi Commercial Pig Units (10 Sows and 1 Boar) out of which 239 units are established.

### Artificial Insemination in Goat:

Odisha has become the first State in the country to launch statewide artificial insemination program for goats using semen of indigenous breeds such as Black Bengal and Ganjam. This pioneering initiative aims to improve the productivity and quality of goat breeds. During 2024-25, a total of 48,560 goats of 26,809 farmers were inseminated & 14,113 kids (Male - 7082 & Female - 7031) are born.

### 3. POULTRY DEVELOPMENT

#### A sub-Scheme of “Prani Sampad Samruddhi Yojana (PSSY)

Odisha ranks 10th in egg production and 12th in poultry meat production in India. Poultry is the fastest-growing sector, generating employment and significantly contributing to rural livelihoods. It plays a crucial role in meeting food and nutritional needs by providing high-quality animal protein. The government actively promotes poultry entrepreneurship to further enhance production and income generation.

#### Poultry Sector Overview:

- Poultry Population :2.74Cr
- Commercial Layer Farms : 182, producing 98.2 lakh eggs/day with a 1.14Cr layer population
- Backyard & Semi-Commercial Production: 16.4 lakh eggs/day
- Total Egg Production: 114.6 lakheggs/day
- Per Capita Availability:
  - \* Eggs: 80 / annum
  - \* Poultry Meat: 2.95kg/ annum

### Progress made under different Poultry Development schemes during FY2024-25 as on 31.03.2025

| Sl.          | Name of the Scheme                                                                                                                | Physical target | Physical achievement (stocking of birds) | Financial target rupees in lakh | Expenditure rupees in lakh |

### 4. FODDER DEVELOPMENT

#### Under “Mukhyamantri Kamdhenu Yojana

Animal Husbandry serves as secondary source of income for millions of rural families, offering significant employment and income generating opportunities. Additionally, it serves as a buffer against the adverse effect of frequent natural calamities in the State. So, to make Animal

Husbandry sector more efficient, sustainable and profitable by reducing production cost through introduction of green fodder in the daily ration of the livestock. During the year 2024-25, under **Mukhyamantri Kamadhenu Yojana (MKY)** 2,00,000 fodder seed minikits were supplied in free of cost to the farmers that covers 42,500 acre of land producing 819.54 TMT of green fodder. The Fodder Entrepreneur Scheme also introduced in this year to support individual as well as farmers group to produce perennial fodder over an area of 2500 acre of land with assistance of Rs. 35,000/- per acre. During this year 33970 No of farmers are also selected in the State for Azolla production programme with assistance of Rs 3,000/- per farmer to construct a cemented Azolla pit for round the year Azolla cultivation that supplements in the feeding of dairy animal.

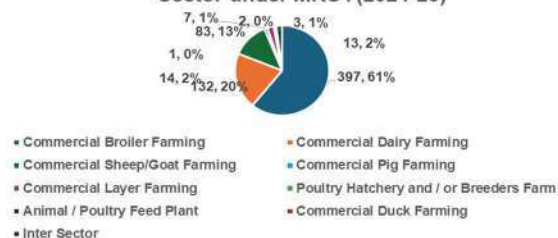

## 5. MUKHYAMANTRI KRUSHI UDYOG YOJANA:

The State Government had launched the modified/ revised guidelines on Commercial Agri Enterprises (CAEs) implemented as Mukhyamantri Krushi Udyog Yojana (MKUY). MKUY envisages the ease of doing agri business through process implication of CAE implementation modalities by making it online in a simple, transparent and time bound manner at all stages, especially for the growth and benefit of farmers & agricultural entrepreneurs of the state.

The assistance for establishment of commercial Agri-enterprises is 40% of the fixed capital investment (excluding the cost of the land) subject to a maximum limit of Rs. 1.00Crore for general entrepreneurs and 50% of the fixed capital investment (excluding the cost of the land) subject to a maximum limit of Rs. 1.00 Crore for SC/ST/Women/Transgender/Persons with disability (PWD)/ Graduates of Agriculture & Allied disciplines.

## 6. LIVESTOCK HEALTHCARE SERVICES

Animal diseases pose a major challenge to the growth of the livestock and poultry sector, leading to reduced production of meat, milk and eggs & adversely affecting farmers' livelihoods. Recognizing the importance of livestock health, the Fisheries & Animal Resources Development Department has established a network of veterinary institutions at various levels & mobile veterinary units (MVU), ensuring comprehensive veterinary services to support disease prevention, diagnosis and treatment. These efforts aim to enhance productivity, safeguard farmers' incomes and promote sustainable growth in the sector.

### HealthCare Services through Veterinary Dispensaries / Hospitals & livestock Aid Centers:

There are 58 veterinary hospitals, 256 Block Veterinary Dispensaries, 227 secondary/tertiary dispensaries & 3239 Livestock Aid centers in the State. They provide animal health care, artificial insemination, health camps, pregnancy diagnosis, castration and extension services. During the year 2024-25, a total of 154.34 lakh cases were treated and 9.82 lakh castrations and 535.25 lakh doses of vaccination were done against different infectious diseases in different livestock and birds.

### Mobile Veterinary Unit (MVU):

Mobile Veterinary Unit provides health care, breeding & advisory services for livestock at the farmer's doorstep in the interior villages where veterinary institutions are far away.

314 hired MVU vehicles have been replaced with Govt. owned customized MVU vehicles which are equipped with wash basin, minor OT, public address system etc. The following services have been provided through MVUs.

| Sl. No. | Particulars                                                                   | Target  | Achievement | % of Achievement |

### Bio-Medical Waste Management:-

For scientific disposal of bio-medical Waste generated at Veterinary hospitals and to ensure environmental hygiene, all 541 Veterinary Hospitals and Dispensaries were tagged with the Bio-Medical Waste Management Agency. An agreement has been executed with the approved BMW agency. These agencies are lifting the BMW generated periodically from the VH/VDs.

### Central Store, Phulnakhara:-

For storage of medicines and equipment, one Central Store has been newly constructed inside the Campus of ADRI, Phulnakhara. The newly constructed central store has been handed over and made operational. Medicines/equipment have been received at that store and are being distributed to the fields. Staff, logistics and CCTV Camera have been provided for the newly constructed central store for smooth operation of the work.

## 6. Livestock Health & Disease Control Program (LH & DCP):

Livestock Health & Disease Control Program (LH&DCP) is the central sector umbrella scheme with component schemes, National Animal Disease Control Programme (NADCP) and Livestock Health & Disease Control Scheme (LH&DC). Under NADCP, Odisha availed 100 % central assistance under sub-schemes: NADCP-FMD and NADCP-Brucellosis. Under Livestock Health & Disease Control Scheme, Odisha availed funds for implementation of PPR EP and CSF CP under Critical Animal Disease Control Program (CADCP) and Assistance to States for Control of Animal Diseases (ASCAD).

### The achievement under different vaccination activities under LH & DCP is as follows:

| Disease       | Target Population | Balance from previous round | No. of doses received | Total vaccine | Vaccination Done (in doses) |
|---------------|-------------------|-----------------------------|-----------------------|---------------|-----------------------------|
| FMD Round-V   | 10362294          | 158400                      | 9072400               | 9230800       | 8635231                     |

### Assistance to States for Control of Animal Diseases (ASCAD):

Under ASCAD assistance is provided to the State of Odisha for control of economically important and zoonotic diseases of livestock and poultry through immunization, strengthening of existing State Veterinary Biological Production Units & State Disease Diagnostic Laboratories, for holding of workshops/seminars & training of Veterinarians and Para-veterinarians. During the year 2024-25 an amount of Rs. 537.59 Lakh has been sanctioned as Central Share and Rs. 340.33 Lakh has been sanctioned as State Share. The funds have already been utilized.

### 7. Frozen Semen Bank, Cuttack

The State's only bull semen station plays a crucial role in enhancing the genetics and productivity of the cattle population by producing and distributing high-quality bull semen. The Frozen Semen Bank (FSB), Cuttack, an ISO 9001:2015 certified semen station, maintains a diverse herd of 103 bulls across twelve categories. These bulls are managed in compliance with the Government of India's Minimum Standards for production of Bovine Frozen Semen (MSP) 2022 and are sourced from approved entities. To ensure genetic quality and disease free condition, they undergo regular health screenings for BVD, IBR, Brucellosis, Campylo bacteriosis, Trichomoniasis, TB & JD at RDDI Kolkata, while NDDB conducts karyotyping, GEBV estimation, and genetic disease testing like DUMPS, Factor-XI deficiency syndrome, BLAD, Citrullinemia for crossbred bulls. This station has been awarded graded "B" status by the Central Monitoring Unit of GoI.

### Semen straw distribution to the field AI institutions

This institution stores frozen semen straws (Conventional, Sex-Sorted & Goat semen) and distributes to 30 districts/Milk unions/BBR & BM Farms, maintaining bull-wise traceability of semen distributed in the state.

### Training Programme

Govt. of India accredited Frozen Semen Training Institute imparted the following training during 2024-25.

- 1) Refresher training of 12 batches of veterinarians and 03 batches of paravets@20 Trainees per batch has been completed.
- 2) Training on Sex sorted semen utilization imparted to 60 nos. of Veterinarians across the state
- 3) Training on the early pregnancy test kit & oligovet product line was imparted to 60 nos. of veterinarians of the state.

### Breeding Bull Production through Assisted Reproductive Techniques And Genomic Selection

Under bull production programme, BAIF & FSB, Cuttack collaboratively used to produce the male calves at CCBF, BAIF, Pune, farmers herds & in BBR & BM farms using ET technology. So far 33 Male Calves has been produced under the programme out of which 2 male calves have been produced at BBR & BMF Chipilima. These male calves will be selected for breeding bulls on the basis of their dam's standard lactation yield and ranking them on the basis of Genomic estimated breeding value.

## 8. ODISHA BIOLOGICAL PRODUCTS INSTITUTE (OBPI)

The Odisha Biological Products Institute (OBPI), plays a crucial role in the development, production and distribution of high-quality vaccines for protecting animal health from infectious diseases. A GMP-compliant laboratory for bacterial vaccines has also been established at Bhubaneswar for production of Haemorrhagic Septicaemia & Black Quarter vaccine OBPI Bhubaneswar is also producing viral vaccines namely Freeze Dried Ranikhet Disease Vaccine (F1 Strain and R2B Strain) & Fowl Pox Disease Vaccine. The OBPI has a satellite unit at Berhampur, which was established on June 15, 1992, to produce Anthrax Spore Vaccine (live) and Enterotoxaemia vaccine for the entire state with products standardized at OBPI-Bhubaneswar.

### Good Manufacturing Practice (GMP) Laboratory

GMP compatible bacterial Vaccine production laboratory for HSV & BQV using fermentation technology is being used at this institute. During the year 2024-25 Twelve(12) regular batches were conducted (HSV-7 batches & BQV-5 batches) with production of around 42.28 lakhs doses of vaccines till 31-03-2025. The construction work of another GMP Compatible vaccine production unit at OBPI, Berhampur is under progress through NDDB.

### Production of Vaccine (Till 31.03.2025)

| S.No | Name of the Vaccines  | Target (doses in lakh) | Total Production in 2024-25 (doses in lakh) | Total supplied in 2024-25 (doses in lakh) | % Vaccine supplied for field use 2024-25 (doses in lakh) |

## 9. ANIMAL DISEASE INVESTIGATION AND SURVEILLANCE:

The Animal Disease Research Institute (ADRI) is the State Level Referral Laboratory under the Animal Resources Development Department, responsible for livestock and poultry disease diagnosis, research, monitoring, and surveillance. It also trains field functionaries and provides expertise during natural calamities like floods, cyclones, and disease outbreaks.

### Ongoing Activities:

1. Routine Disease Diagnosis- Pathological sample Examination like Blood, Urine, Milk, fecal material etc. of livestock by automated analyzers, microscopy and molecular methods using PCR.
2. Sero-surveillance/Monitoring of six disease control programs:
  - o FMD, Brucellosis, PPR, CSF, Avian Influenza & Anthrax.
3. Data Collection & Reporting to DAHD, Govt. of India, and State Forest & Health Departments.
4. Training for veterinarians, para-veterinarians, and forest officials.
5. Sample Collection & Dispatch for:
  - o Porcine serum, blood & Nasal Swab (Japanese Encephalitis).
  - o Bovine brain sample (BSE surveillance under NPRSM).
6. Screening Tests for Brucellosis, Salmonellosis.
7. Tuberculin/Johnin Testing for Tuberculosis & Johne's disease in BBR & BM farms

### Achievement of ADRI

## 10. STRENGTHENING INFRASTRUCTURE FACILITIES OF ARD SECTOR

In the year 2024-25, the construction and renovation of various field offices and administrative offices have been undertaken, including training institutions such as VOTI, LITC, RTC, DTC as well as CDVO offices, SDVO offices and livestock farms. These projects are being executed by the Works Department and are currently in progress. Additionally, 20 Livestock Aid Centres are being constructed to strengthen veterinary service delivery at the grass roots level. The repair of 32 administrative buildings, the strengthening of 26 DDLs and the construction of six new Sub-Divisional Veterinary Officers' offices have also been initiated in FY 2025. These projects are being implemented with a budget allocation of ₹ 95.95 crore.

The Veterinary Officers Training institute is being strengthened by means of renovation & new construction to provide proper training facilities to Veterinary Officers, Paraveterinarians etc. Funds amounting to Rs. 1.28 Crores have been sanctioned for the above purpose. The construction of Farmers Hostel at VOTI is under consideration.

The existing Livestock farms ( 23 nos.) have been strengthened in the FY 2024-25. Funds amounting to Rs. 7.2 Crores has been sanctioned for the purpose.

**Besides the above Construction work, 9 Modular OTs have been completed during FY2024-25.**

## 11. VETERINARY OFFICERS' TRAINING INSTITUTE

VOTI is the apex centre for in-service training of veterinarians and other functionaries within and outside AHD in view of supporting the sustainable livestock development in the state of Odisha.

Based on the yearly training programme, the curriculum and previous experience, the VOTI team, in cooperation with resource persons, develops the syllabus, lesson plan and reference materials. The institute is responsible to organise and conduct the training courses as per the programme approved by the Director, AH & VS. Further the institute collaborates with other institutions of AHD as well as with outside institutions for organising training programmes.

### Abstract of traing programmes during 2024-25

| Sl. No | Type of Training                                                                                                                                                                      | No. of participant trained |
|--------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------|
| 1      | Training Programme of veterinarian on wildlife health and disease control with special emphasis on wild Elephant Treatment in collaboration with office of PCCF and Chief WLF Warden. | 200                        |
| 2      | Refresher Training Programme under ASCAD for Veterinary Officers                                                                                                                      | 114                        |
| 3      | Training on X-ray and Ultra sonography as modern diagnostics techniques for Veterinary Officers                                                                                       | 100                        |
| 4      | Accounts & Administration training for DDOs                                                                                                                                           | 39                         |
| 5      | Disaster Management in collaboration with OSDMA for field veterinary officers                                                                                                         | 80                         |
| 6      | Behavioural Management Training for field veterinary officers                                                                                                                         | 80                         |
| 7      | Induction Training for newly recruited OVS Officers                                                                                                                                   | 80                         |
| 8      | Communication & documentation skills for professional Excellence (EEI Hyderabad)                                                                                                      | 28                         |
| 9      | Refresher training on Artificial Insemination & Reproductive health Management for field veterinary officers                                                                          | 236                        |
| 10     | EEI Off campus Training Programme on ToT                                                                                                                                              | 18                         |
| 11     | Pet Health Management for field veterinary officers                                                                                                                                   | 60                         |
| 12     | Accounts & Administration training for Ministerial staffs                                                                                                                             | 216                        |

## 12. ANIMAL WELFARE ACTIVITIES

### Mukhyamantri Pranikalyan Yojana (2024-25)

Under this scheme, the following activities have been taken.

#### Support to Private Goshalas

- Financial assistance of Rs.19.50 crore provided to 83 registered goshalas in the state
- Benefited 21552 stray and destitute animals for feeding and maintenance.

#### Support to Godhan Kendra

- 55 projects have been supported with financial assistance of 2.14 Crores under support to Godhan Kendra for cow dung management and sustainability of Goshalas in the state.

#### Televeterinary Services with video calling facilities

- Expanded from 2 to 7 nodes for toll-free number 1962
- Total cases handled 105998 till 31st March 2025.
- Introduced video calling facilities to benefit livestock farmers
- 26793 farmers benefited from tele veterinary services till 31st march 2025.

#### Animal Help Line (AHL) with Ambulance Services

- 83268 stray animals treated till March 31 2025 by 14 AHL units operating in 11 locations in the state.

#### Establishment of New Goshalas

- 5 new Goshalas are completed and 11 new Goshalas are under different stages of construction.
- Up on completion more than 1800 stray and destitute cattle will be sheltered in these Goshalas.

### 13. ODISHA LIVESTOCK RESOURCES DEVELOPMENT SOCIETY

OLRDS is the state implementing agency for all bovine breeding activities of the state. OLRDS is committed to the socioeconomic development of the people through genetic upgradation of existing cattle and buffalo. The key functions performed by OLRDS are as follows.

- ▶ Production of quality bull semen by adopting strict bio-security measures.
- ▶ Conservation and improvement of native germ plasm through selective breeding.
- ▶ Implementation of Livestock Insurance Scheme.
- ▶ Use of Sex Sorted Semen

The following key achievements were made.

#### Artificial Insemination

▶ **18.26 lakh** animals have been covered against the target of 20.69 lakh (88.25% of target) under Nationwide Artificial Insemination Programme Phase-IV (NAIP-IV) during the period 01. 08. 2022 to 31.03.2025.

▶ **Use of Sex Sorted Semen-** 295190 doses of SSS have been procured out of which 203970 doses have been utilized and 160269 numbers of farmers have been benefited. Under this scheme, till now 37008 HGM female calves have been born under this project.

#### Livestock Insurance:

Go-Sampad Bima Yojana" under Mukhya Mantri Kamdhenu Yojana (MKY) is being implemented under state plan from this year with 85% subsidy on premium cost aiming to insure 139300 milch animals besides 1570 milch buffaloes, 5000 milch cows and 20000 female calves. Similarly, under Centrally Sponsored Scheme National Livestock Mission, it is aimed to insure 12500 large animals and 8000 small animals during 2024-25.

#### Establishment of Accredited Agent for Health and Extension of Livestock Production (A-HELP)

The selected members of SHGs will act as Livestock Resource Persons and Primary Service Providers through a new credited model named "A-HELP" (Accredited Agent for Health and Extension of Livestock Production).

The project has been implemented during this year with a target to train 2000 Pranimitra as (Women) over 3 years. During the year 2024-25, it was scheduled for training of 1000 PraniMitras as A-HELP & the achievement against the target was 889.

#### Establishment of 1500 MAITRIs

The primary focus of the project is to enhance productivity of existing bovine population by increasing Artificial Insemination coverage through establishment of Multi-purpose Artificial Insemination Technicians in Rural India (MAITRIs) to deliver artificial insemination services at farmers' doorstep on a self-sustainable basis. Under this project, 1500 MAITRIs have been selected, 1500 MAITRIs have already completed the 90-day training programme, 1015 MAITRIs are providing AI services. During this year, 88156 inseminations have been performed by MAITRI.

#### On Call AI

The On-Call AI service pilot project in Puri district has revolutionised the AI process and brought in transparency for the ongoing AI process. The service was scaled up in the other nine districts such as Balasore, Bargarh, Bhadrak, Cuttack, Ganjam, Jagatsinghpur, Jajapur, Kendrapara and Mayurbhanj from 17<sup>th</sup> January 2024. Through ON CALL AI programme, 310378 AI have been booked and 2.09 Lakhs AI has been performed.

### 14. ODISHA STATE POULTRY PRODUCTS CO-OPERATIVE MARKETING FEDERATION LTD (OPOLFED):

Odisha State Poultry Products Co-operative Marketing Federation Ltd. (OPOLFED) is a state level apex co- operative organization registered as a society on 29-03-1976 and declared as an Apex

Co-operative Federation on 22-3-1984. ## 16. INFORMATION, EDUCATION & COMMUNICATION

The "Information, Education, and Communication" (IEC) programme educates livestock farmers on modern practices to boost production and productivity, enhance livelihoods and foster entrepreneurship.

### IEC Activities under Electronic, Print & Social Media

Television and radio are vital for spreading messages state wide. To educate livestock farmers of the state, TV commercials, TV spots and radio jingles on livestock activities aired on regional channels, Doordarshan, FM Radio and All India Radio. Advertisements in major Odia newspapers enhanced awareness. Social media, crucial in today's tech-savvy society, was also utilized. The State Government's Animal Resources Development (ARD) sector uses Facebook, Twitter, and YouTube to educate the public on modern animal husbandry practices.

### Exhibitions/Fairs/Melas:

#### Matsya O Pranee Sampad Mela (MOPSM)

The "Matsya O Pranee Sampad Mela (MOPSM)" was held in 30 districts of Odisha during November 2024 to February 2025. Aimed at raising awareness among livestock and fish farmers about scientific farming practices, the Mela included general meetings, farmer-scientist interactions, departmental exhibitions and live demonstrations of fish and animals. Cultural programs were also organized in the melas. Around 70,000 farmers and 1,00,000 visitors attended the fair in different districts.

### Krushi Odisha - 2025

Animal Resources Development exhibition was organized in the state level agriculture fair Krushi Odisha 2025. Seven indoor stalls and a space of 2000 square feet were designed to showcase livestock related activities and there was demonstration of live animals along with birds and green as well.

### Observation of National Milk Day

National Milk Day was observed with an objective to recognize the importance of milk in states economy and nutrition, and to honor the dairy industry and its professionals.

## MATSYA- PRANEE SAMAVESH ODISHA-2025

“MPSO-2025” is the state level fair organized during 14th to 16th February 2025 by the Fisheries & Animal Resources Development (F&ARD) Department, at Biju Pattnaik Play ground, Baramunda, Bhubaneswar. The Samavesh with the theme “Fisheries & Animal Husbandry for Life, Livelihood & Climate Resilience” created mass awareness and educated farmers of the state on scientific farming practices and adoption of modern technologies in fisheries & animal husbandry sector for sustainable and climate resilient fisheries and livestock farming. Activities like stall exhibition, live animal & fish demonstration, general meetings,

farmers-scientists interaction through panel discussions, cultural programmes, felicitation of best farmers in dairy, Fisheries & Animal Husbandry sectors was organised in the Samavesh. Around 10,000 farmers, entrepreneurs & WSHG members from across the state have attended the event and witnessed the exhibitions and participated in the activities. Around 200 stalls inside German Hangars and an equal number of stalls in the open space, involving various government departments, organizations, universities, companies, WSHGs, FPOs, startups, were installed in the Samavesh, which is the major source of attraction for farmers & entrepreneurs.

## Matsya O Pranee Sampad Mela (MOPSM)

District level fisheries and animal resources development fair “Matsya O Pranee Sampad Mela (MOPSM)” was organized for the second time in districts of the state during November 2024 to January 2025. With activities like general meetings, farmers-scientists interaction, exhibitions, live demonstration of fish, livestock & birds and cultural programmes, the fairs created mass awareness among fishers, fish & livestock farmers on adoption of scientific farming practices through use of modern technologies. Around two lakh visitors witnessed the exhibitions and more than two hundred fish & livestock farmers got felicitated in MOPSM.

## MATSYA-PRANEE SAMAVESH ODISHA (MPSO-2025)

Under the overarching theme of ‘Fisheries & Animal Husbandry for Life, Livelihood & Climate Resilience’ the state level fisheries & animal resources development fair “Matsya-Pranee Samavesh Odisha-2025” was organised for the second time in the state from 14<sup>th</sup> to 16<sup>th</sup> February 2025 at Biju Patnaik Playground, Baramunda, Bhubaneswar. The Samavesh sought to ignite a wave of mass awareness, empowering farmers with knowledge on scientific farming practices and

adoption of modern technologies in Fisheries & ARD sector. A bucket of activities viz. live animal demonstration, stall exhibition, seminars, virtual tour, dog show, walkathon, cultural programmes were organized to engage the visitors in knowledge gaining procedures. Around 1 lakh visitors from across the state witnessed the event, more than 8000 farmers took part in exhibitions, around 300 farmers got felicitated and 2400 farmers participated in 12 knowledge-sharing interactive sessions.

Poonganur is the shortest breed of cattle in the world. The cows of this breed look like calves. The miniature cattle of the breed have a high demand for rearing as companion animals. 3 pairs of Poonganur cattle were exhibited in MPSO-2025 and created much hype with attraction of more number of visitors. A pair of miniature Poonganur cattle costs around 10 lakh rupees.

Champion Buffalo Bull **‘BHEEM’** brought from Rajasthan was exhibited in MPSO – 2025. The owner collects semen from Bheem and sells a dose of it at Rs.500/-. He earns around Rs. 1 Crore per year out of it. The feed of Bheem included 20 litres of milk, apple, banana, bilona ghee halwa, dry fruits etc. per day besides green fodder and concentrate feed. The approximate cost of Bheem is Rupees Twenty Four Crore.

### Nod to set up small dairy units in Ganjam

Hrusikesh Mohanty | TNN

Berhampur: In a bid to increase milk production in Ganjam district, the govt on Sunday gave the green signal to 53 farmers for setting up small dairy units under the Mukhyamantri Kamadhenu Yojana. Under the scheme, the farmers will get a subsidy for essential inputs.

Minister Gokulananda Mallik said milk production in the district will hopefully double in six months.
